Executive Director

Division of Finance

John C. Reidhead, CPA
Director

November 13, 2006

To the Citizens, Governor,
and Members of the Legislature
of the State of Utah:

It is our pleasure to present the 2006 Comprehensive Annual Financial Report of the State of Utah in accordance with Section 63A-3-204 of the *Utah Code*. Responsibility for the accuracy of the data and the completeness and fairness of the presentation, including all disclosures, rests with the State's management. To the best of our knowledge and belief, the enclosed data accurately presents the State's financial position and results of operations in all material respects in accordance with generally accepted accounting principles (GAAP). We believe that all disclosures necessary to enable the reader to gain an understanding of the State's financial activities are included.

Internal Control. The State's systems of internal control over assets recorded in the accounting system have been designed to provide reasonable, but not absolute, assurance of safeguarding assets against loss from unauthorized use or disposition and to ensure the reliability of financial records for preparing financial statements. The concept of reasonable assurance recognizes that the cost of a control should not exceed the benefits likely to be derived and that the evaluation of costs and benefits requires estimates and judgments by management.

Independent Auditors. In compliance with state statute, an annual financial audit of the "State Entity" is completed each year by the Utah State Auditor's Office in conjunction with other independent audit firms. Their audits were conducted in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States. The State Auditor's report on the Basic Financial Statements is included in the Financial Section of this report.

Federal regulations also require the State to undergo an annual "Single Audit" in conformance with the Federal Single Audit Act of 1984, as amended, and the U.S. Office of Management and Budget Circular A-133, *Audits of State and Local Governments and Non-Profit Organizations*. Information related to the Single Audit, including the schedule of expenditures of federal awards, audit findings and recommendations, summary of prior audit findings, and the State Auditor's report, is issued in a separate report and will be available at a later date.

Management's Discussion and Analysis (MD&A). The discussion and analysis beginning on page 14 provides an overview and analysis of the State's Basic Financial Statements. This letter of transmittal is intended to complement the MD&A and should be read in conjunction with it.

PROFILE OF THE GOVERNMENT

Structure. As shown in the organizational chart on page 10, state government is divided into three separate branches: legislative, executive, and judicial. The duties of each branch are outlined in the *Constitution of Utah*, which can be amended only by a majority vote of the State's citizens, and in the *Utah Code*, which can be amended by the Legislature or by citizen initiatives. State government services provided to citizens include building and maintaining roads; providing public safety,

health, and environmental protection services to protect the general welfare of the state's citizens; helping adults, children, and families through difficult times such as abuse, divorce, illness, death, and unemployment; fostering an attractive business climate to encourage economic growth; and protecting public lands and natural resources for conservation and recreational activities. The State also provides significant financial support to its higher education institutions, local governments, and school districts to help those entities meet the specific needs of their constituents.

This report includes all funds of the State of Utah and includes all departments, agencies, and other organizational units governed by the Legislature and/or the constitutional officers of the State. In addition to these *primary government* activities, this report includes information related to component units that are financially accountable to the State. Although such information is provided in this report, the MD&A and Basic Financial Statements focus on the primary government and its activities. Separately issued financial statements are available from the significant discretely presented component units and should be read to obtain a better understanding of their financial conditions. Additional information on all discretely presented components units can be found in the notes to the financial statements (see Note 1. A.).

Budgetary Control. The *Constitution of Utah* requires that budgeted expenditures not exceed estimated revenues and other sources of funding, including beginning fund balances. Annually, the Governor is required to submit a balanced budget by fund, function (e.g., health), and activity (e.g., medical assistance) to the Legislature. The Legislature authorizes expenditures in the annual *Appropriations Acts*. The Acts also identify the sources of funding for budgeted expenditures. In the event actual revenues are insufficient to cover budgeted expenditures, the Governor must order budget reductions or call a special session of the Legislature to address budget issues. Adjustments to the budget may also be made throughout the year for changes in departmental or fund revenues so that departments and funds will not end the fiscal year in a deficit position. For additional information on budgetary control see the notes to Required Supplementary Information on page 113.

Spending Limitation. The State has an appropriation limitation statute that limits the growth in the combined appropriations from the General Fund and from income tax revenues for higher education to the relative growth in population and inflation. For the fiscal year ended June 30, 2006, the State was \$50.4 million below the appropriations limitation. The State is currently below the fiscal year 2007 appropriations limitation by \$18.7 million.

ECONOMIC CONDITIONS AND OUTLOOK

Economy. Nationally, corporate before-tax profits increased 32.7 percent in 2005 and are expected to rise 18.6 percent through the end of 2006 as the economy begins to show signs of stabilizing. The national unemployment rate was 5.1 percent in 2005, and is expected to remain relatively unchanged for the next two years. Generally, Utah's economic indicators have mirrored these national trends, though the State's economy seems to be stronger than most states across the nation.

Utah's unemployment rate is expected to fall from 4.3 percent in 2005 to 3.3 percent in 2006. This trend represents a strong economy, with little economic slack. However, the State's unemployment rate is slightly higher than the ten-year low of 3.1 percent in 1997. With the continuing drop in unemployment, personal income and nonagricultural wages are expected to increase in 2006 by 9.0 percent and 10.1 percent, respectively. Retail sales are estimated to grow 10.0 percent in 2006 and 6.5 percent in 2007. In 2005, total construction value reached a new all time high of \$6.6 billion, a 28.7% increase from the 2004 record. Residential construction again led the way with a record \$4.7 billion in new construction compared to \$3.6 billion in 2004. Construction is expected to be up in 2006 with 9.1 percent job growth and 12 percent higher valuation than in 2005 as the economy continues to expand. Utah experienced net in-migration of approximately 41,000 in 2005, the highest level since World War II. Utah has had net in-migration for the past 16 years and this trend is expected to continue in 2006 and 2007.

Industries. Utah's nonagricultural employment is expected to increase 4.9 percent in 2006. From September 2005 to September 2006, every industry experienced positive employment growth led by natural resources and mining (17.5 percent) and construction (16.9 percent). Other industries experiencing strong growth in the past year were professional and business services (7.3 percent), financial activities (5.4 percent), education and health services (4.2 percent), leisure and hospitality (3.6 percent), manufacturing (3.6 percent), and trade, transportation and utilities (3.5 percent). Construction added 14,700 new jobs, leading the way for the second straight year with most new jobs added. Another growth area was the professional and business services sector, adding 11,100 new jobs where generally higher education levels are required and compensation is higher than jobs in other sectors. Other sectors that contributed to job growth were trade, transportation and utilities (7,900), education and health services (5,500), manufacturing (4,200), leisure and hospitality (3,800), and financial activities (3,700). The need to move more goods and raw materials for construction and manufacturing activities caused an increase in trade, transportation, and utilities jobs. Strong population growth created the need for more employment in the construction, financial activities, education and health services, and trade, transportation and utilities sectors.

Outlook. Utah's economy is expected to continue on the growth path that began in 2004. However, the shrinking pool of available workers and a slowing national economy may limit job growth slightly in the future. The State is positioned well for positive long-term economic growth due to its industrial diversity, population growth, and young and highly educated workforce.

MAJOR INITIATIVES

Utah's economy continues to improve, providing approximately \$637 million additional income and sales tax revenue in fiscal year 2006. These additional funds were directed to priorities such as tax reform, economic development, infrastructure, and education.

Tax Reform. In an effort to moderate growth in government and stimulate long-term economic growth, numerous tax reform initiatives were passed. Sales and use tax reform initiatives are expected to reduce state revenues by \$55 million in fiscal year 2007 and \$90 million in fiscal year 2008. This includes a 2 percent annual reduction in sales tax on food of \$70 million and business tax reductions of \$20 million. In addition, during the 2006 Fourth Special Session, Senate Bill 4001, *Income Tax Amendments*, expanded existing individual tax brackets and reduced the top bracket for taxable years beginning January 1, 2006. The bill also created an alternative flat rate computation. For taxable years beginning January 1, 2007, taxpayers may calculate their individual income tax liability in two different ways and pay the lesser of the two calculations. The individual tax reform initiative is expected to reduce State revenues by \$66 million per year beginning in fiscal year 2007.

Economic Development. The Governor's economic development plan for Utah focuses on strengthening the business environment and developing industries that capitalize on economic trends and leverage the State's natural advantages.

Utah is known as a world-class research center and for its ability to commercialize research in new companies that make the world a better place. The State is also known for its skilled and educated workforce. To capitalize on Utah's unique resources, the 2005 General Session provided \$7.35 million in initial funding to the University of Utah and Utah State University to recruit and hire research teams, purchase research equipment, and implement a technology research and development initiative. This effort will target technologies with high commercial potential and nurture an entrepreneurial environment. The 2005 initiative was named the Utah Science, Technology, and Research (USTAR) Economic Development Initiative. During the 2006 General Session, Senate Bill 75, *USTAR Initiative*, greatly broadened the scope and funding by providing \$19.3 million ongoing monies beginning in fiscal year 2007 and creating the USTAR Governing Authority to

oversee activities related to the initiative. Senate Bill 75 also appropriated \$50 million one-time funding for fiscal year 2007, and provided bonding authorization for \$111 million to construct new lab facilities at the two research universities.

Education. The State provided \$121 million for fiscal year 2007 through a 6.0 percent increase in the Weighted Pupil Unit to fund increases in teacher salaries and benefits and increased operating costs. The State also appropriated an additional \$37.5 million to higher education for fiscal year 2007. This included \$21.9 million for increases in salary and benefits; \$5.1 million for increases in fuel and power costs; \$2.8 million for student financial aid; \$0.8 million for National Guard personnel tuition assistance; and various amounts for engineering, technology, and nursing initiatives.

Infrastructure. The State has developed a national reputation for strong fiscal management. Continuing the “Pay-As-You-Go” plan to manage the State’s debt, for fiscal year 2007 the Legislature provided \$130 million of one-time money and \$20 million ongoing for capital development projects for renovation of the State Capitol and several other state buildings. To address the State’s maintenance needs, the Legislature provided a total ongoing funding package of \$63 million for capital improvements for fiscal year 2007, which included a \$6.8 million increase from the prior year appropriation. An additional \$2.5 million one-time money was added to mitigate life/safety hazards at state buildings. These totals represent the highest funding level ever appropriated to address the State’s maintenance needs.

In the past decade, highway funding has not kept pace with the increased number of individuals traveling on Utah’s roads. Therefore, funding for transportation was a major priority for both the Governor and the Legislature. For fiscal year 2007, the State appropriated \$201 million to the Centennial Highway Fund for statewide transportation issues, and an additional \$90 million ongoing money to be used for capacity and safety projects. House Bill 112, *Transportation Investment Act*, changed currently earmarked General Fund transfers from specific dollar amounts to 8.3 percent of sales and use tax collections. The transfer is estimated to be \$150 million for fiscal year 2007.

FINANCIAL INFORMATION

Cash Management. As further explained in Notes 1, 3, and 4 to the Basic Financial Statements, cash is controlled by the State Treasurer or by other administrative bodies as specified by law, and investments are made in compliance with the State Money Management Act (*Utah Code*, Title 51 Chapter 7). All cash deposited with the State Treasurer by state entities is managed in pooled investment funds to safeguard assets and to maximize interest earnings. The Treasurer invests the cash, including the cash float, in short-term securities and other investments such as certificates of deposit, obligations of the U.S. Treasury, commercial paper, and repurchase agreements. Certain investment pools may invest in corporate bonds and equity securities.

Debt Administration. The State’s general obligation bonded debt jumped significantly in 1998 due to issuing bonds for highway construction, mostly for rebuilding I-15 in Salt Lake County. Total general obligation debt remained fairly stable from 1999 through 2001. In fiscal years 2002 through 2003, under budget constraints coupled with a low interest rate environment, the State elected to increase its debt by issuing more bonds for highway and building projects that otherwise would have been funded from current revenues. During fiscal year 2006, the State issued no new general obligation bonds. More information about the State’s long-term debt is found in Note 10 to the Basic Financial Statements.

Risk Management. The State is self-insured against certain property and liability claims. The Legislature established the Risk Management Fund to pay for commercial insurance or to accumulate reserves for the self-insured portion of certain property and liability risks. Revenues are generated from premiums charged to state departments, institutions of higher education, and local school districts. The property self-insurance limits for fiscal year 2006 were \$1 million per claim, with an annual aggregate of \$2.5 million per policy year. Generally, claims over the self-insured limits are covered by policies with private insurance companies.

Pension Plans. The Utah Retirement Systems (URS) defined benefit pension systems’ combined total net assets increased by \$1.4 billion, or 8.5 percent during calendar year 2005. The increase was primarily due to the increase in equity markets and increasing retirement contributions. However, even with the increase in total net assets, the average funded ratio of all systems decreased slightly from 92.4 percent at the beginning of 2005 to 92.2 percent at December 31, 2005, due to increases

in the actuarially determined pension obligations. Operations of the pension systems continue to be managed based on sound actuarial funding principles, thus protecting participants' future benefits. The URS management anticipates that investment earnings on a long term basis will continue to meet or exceed the actuarially assumed earning rate.

CERTIFICATE OF ACHIEVEMENT

The Government Finance Officers Association of the United States and Canada (GFOA) awarded the *Certificate of Achievement for Excellence in Financial Reporting* to the State of Utah for its comprehensive annual financial report for the fiscal year ended June 30, 2005. This was the twenty-first consecutive year the State has achieved this prestigious award.

In order to be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized comprehensive annual financial report. This report must satisfy both accounting principles generally accepted in the United States of America and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe that our current comprehensive annual financial report continues to meet the Certificate of Achievement Program's requirements, and we are submitting it to GFOA to determine its eligibility for another certificate. We are committed to this effort, and we intend to maintain a highly qualified and professional staff to make this certification possible.

CONCLUSION

We hope this report provides data useful in evaluating the financial activity of the State of Utah. We express our appreciation to the budget and accounting officers throughout state government and to the Utah State Auditor's Office for their dedicated efforts in assisting us in the preparation of this report.

Sincerely,

A handwritten signature in black ink, reading "John Reidhead". The signature is fluid and cursive, with the first name "John" and last name "Reidhead" clearly distinguishable.

INDEPENDENT STATE AUDITOR'S REPORT

To the Members of the Legislature
of the State of Utah and
The Honorable Jon M. Huntsman, JR.
Governor, State of Utah

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Utah as of and for the year ended June 30, 2006, which collectively comprise the State's basic financial statements as listed in the table of contents. These financial statements are the responsibility of the State's management. Our responsibility is to express opinions on these financial statements based on our audit. We did not audit the financial statements of Utah Housing Corporation; Utah Public Employees Group Insurance; the University of Utah's hospital and component units; Utah State University; portions of the Utah College of Applied Technology; the Dairy Commission; and the Utah State Retirement Office, which represent 49 percent of the assets and 50 percent of the revenues of the aggregate discretely presented component units and 77 percent of the assets and 22 percent of the revenues/additions of the aggregate remaining fund information. Those financial statements were audited by other auditors whose reports thereon have been furnished to us; and our opinions, insofar as they relate to the amounts included for those agencies, funds, and component units, are based on the reports of the other auditors.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion of the effectiveness of the State's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit and the reports of other auditors provide a reasonable basis for our opinions.

In our opinion, based on our audit and the reports of other auditors, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Utah as of June 30, 2006, and the respective changes in financial position and cash flows, where applicable, thereof for the year then ended in conformity with accounting principles generally accepted in the United States of America.

In accordance with Government Auditing Standards, we have also issued our report, dated October 27, 2006, on our consideration of the State's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with Government Auditing Standards and should be considered in assessing the results of our audit.

The accompanying management discussion and analysis on pages 14 through 23 and the required supplementary information on pages 107 through 115 are not a required part of the basic financial statements but are supplementary information required by accounting principles generally accepted in the United States of America. We and the other auditors have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the required supplementary information. However, we did not audit the information and express no opinion on it.

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the State's basic financial statements. The introductory section, the supplementary information – combining statements and individual fund statements and schedules, and the statistical section are presented for purposes of additional analysis and are not a required part of the basic financial statements. The supplementary information – combining statements and individual fund statements and schedules on pages 117 through 179 has been subjected to the auditing procedures applied by us and the other auditors in the audit of the basic financial statements and, in our opinion, based on our audit and the reports of other auditors, is fairly stated in all material respects in relation to the basic financial statements taken as a whole. The introductory section on pages 1 through 10 and the statistical section on pages 181 through 221 have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we express no opinion on them.

A handwritten signature in black ink, reading "Auston G. Johnson". The signature is fluid and cursive, with the first name "Auston" being more prominent and the last name "Johnson" following in a similar style.

Auston G. Johnson, CPA
Utah State Auditor
October 27, 2006

INTRODUCTION

The following is a discussion and analysis of the State of Utah's financial performance and position, providing an overview of the State's activities for the fiscal year ended June 30, 2006. Please read it in conjunction with the transmittal letter in the Introductory Section of this report and with the State's financial statements that follow this section.

HIGHLIGHTS

Government-wide

- The State's total net assets increased \$1.864 billion or 15.3 percent over the prior year. Net assets of governmental activities increased \$1.549 billion or 14.9 percent due to an improving economy and active resource management. Net assets of business-type activities also grew significantly, increasing by \$315.2 million or 18.0 percent, primarily due to revenues from employers' unemployment premiums exceeding benefit payments for the second consecutive year.

Fund Level

- Combined tax revenues were 10.2 percent higher in the General Fund and 25.2 percent higher in the Uniform School Fund than the prior year as Utah's economy showed continued signs of improvement. The State's economic slowdown in 2002 and 2003 and subsequent improvement in fiscal years 2004 through 2006 is similar to the trend of the national economy.
- The General Fund and Uniform School Fund ended the fiscal year with "surplus" from unreserved and undesignated sources of \$85.1 million and \$223.3 million, respectively. By law, \$21.9 million of the surplus in the General Fund was transferred to the General Fund Budget Reserve Account ("Rainy Day Fund"), and \$56.6 million of the surplus in the Uniform School Fund was transferred to the Education Budget Reserve Account.

Long-term Debt

- The State's long-term bonded debt increased a net \$433.4 million or 12.5 percent. Revenue bonds were issued to fund capital facility construction, and for purchasing student loans in the Student Assistance Programs. No new general obligation bonds were issued.

OVERVIEW OF THE FINANCIAL STATEMENTS

This report includes the State's Basic Financial Statements, Required Supplementary Information, and Supplementary Information. The Basic Financial Statements include three components: government-wide financial statements, fund financial statements, and notes to the financial statements.

Government-wide Statements – Reporting the State as a Whole

The Statement of Net Assets and the Statement of Activities beginning on page 27 together comprise the *government-wide financial statements*. These statements provide a broad overview with a long-term focus of the State's finances as a whole and are prepared using the *full-accrual* basis of accounting, similar to private-sector companies. This means all revenues and expenses are recognized regardless of when cash is received or spent, and all assets and liabilities, including capital assets and long-term debt, are reported at the entity level.

The government-wide statements report the State's *net assets* – the difference between total assets and total liabilities – and how they have changed from the prior year. Over time, increases and decreases in net assets measure whether the State's overall financial condition is getting better or worse. In evaluating the State's overall condition, however, additional non-financial factors should be considered such as the State's economic outlook, changes in its demographics, and the condition of its capital assets and infrastructure. The government-wide statements report three activities:

Governmental Activities – Most of the State's basic services fall under this activity including education, transportation, public safety, courts, corrections, health, and human services. Taxes and federal grants are the major funding sources for these programs.

Business-type Activities – The State operates certain activities much like private-sector companies by charging fees to customers to cover all or most of the costs of providing the goods and services. Student loans, unemployment compensation, water project loan programs, and liquor sales are examples of business-type activities.

Component Units – A number of entities are legally separate from the State, yet the State remains financially accountable for them. Colleges and Universities, Utah Housing Corporation, and Utah State Fair Corporation are examples of component units.

Fund Financial Statements – Reporting the State's Most Significant Funds

The fund financial statements beginning on page 32 provide detailed information about individual major funds, not the State as a whole. A fund is a group of related accounts that the State uses to keep track of specific resources that are segregated for a specific purpose. Some funds are required by law to exist, while others are established internally to maintain control over a particular activity. All of the State's funds are divided into three types, each of which uses a different accounting approach.

Governmental Funds – Most of the State's basic services are accounted for in governmental funds and are essentially the same functions reported as *governmental activities* in the government-wide statements. Governmental funds use the *modified accrual* basis of accounting, which measures the flow of current financial resources that can be converted to cash and the balances left at yearend that are available for future spending. This *short-term* view of the State's financial position helps determine whether the State has sufficient resources to cover expenditures for its basic services in the near future.

Proprietary Funds – Proprietary funds include enterprise funds and internal service funds and account for state activities that are operated much like private-sector companies. Like the government-wide statements, proprietary fund statements are presented using the *full-accrual* basis of accounting. Activities whose customers are mostly outside of state government (e.g., water project loans to local governments) are accounted for in *enterprise funds* and are the same functions reported as *business-type activities*. Thus, the *enterprise fund* financial statements reinforce the information reported for *business-type* activities in the government-wide statements, but provide more detail and additional information, such as cash flows. Activities whose customers are mostly other state agencies (e.g., motor pool) are accounted for in *internal service funds*. The internal service fund activities are consolidated with the governmental activities in the government-wide statements because those services predominantly benefit governmental rather than business-type activities.

Fiduciary Funds – Fiduciary funds account for assets that, because of trust relationships, can be used only for trust beneficiaries. The State is responsible for ensuring these assets are used for their intended purposes. Fiduciary funds use *full-accrual* accounting but are *not* included in the government-wide statements because their assets are not available to finance the State's own programs.

Reconciliation between Government-wide and Fund Statements

The financial statements include schedules on pages 34 and 38 that reconcile and explain the differences between the amounts reported for *governmental activities* on the government-wide statements (full-accrual accounting, long-term focus) with amounts reported on the *governmental* fund statements (modified accrual accounting, short-term focus). Following are some of the major differences between the two statements:

- Capital assets and long-term debt are included on the government-wide statements but are not reported on the governmental fund statements.
- Capital outlay spending results in capital assets on the government-wide statements but are expenditures on the governmental fund statements.
- Bond proceeds result in liabilities on the government-wide statements but are other financing sources on the governmental fund statements.
- Certain tax revenues that are earned but not yet available are reported as revenue on the government-wide statements but are deferred revenue on the governmental fund statements.

Notes to the Financial Statements

The notes beginning on page 58 provide additional schedules and information that are essential to a complete understanding of the financial statements. The notes apply to both the government-wide financial statements and the fund financial statements.

Required Supplementary Information (RSI)

Following the Basic Financial Statements are budgetary comparison schedules for major funds with legally adopted budgets and condition assessment data related to infrastructure. RSI further supports the information in the basic financial statements.

Supplementary Information

Supplementary Information includes combining statements for the State's nonmajor governmental, nonmajor proprietary and fiduciary funds and for nonmajor discretely presented component units. This section also includes schedules which compare budgeted expenditures to actual results at the legal level of control, which is generally the line item level of the *Appropriation Acts*.

FINANCIAL ANALYSIS OF THE STATE AS A WHOLE

Net Assets

The State's total net assets increased \$1.864 billion or 15.3 percent in fiscal year 2006. In comparison, net assets in the prior year increased \$1.012 billion or 9.1 percent. This increase in net assets resulted from an improving economy and the active management of state resources. Approximately \$526.1 million of the increase was in net capital assets as the State's investment in highways and buildings exceeded depreciation and net additional debt to finance projects. Total restricted net assets increased \$1.072 billion or 43.8 percent over the prior year. The \$860.7 million increase in restricted net assets of governmental activities was primarily due to an increase of \$709.7 million in expendable net assets for public education as a result of increased individual income and corporate tax revenues. Also, nonexpendable net assets for public education increased \$156.8 million as a result of an increase in net earnings in the permanent Trust Lands Fund. Restricted net assets increased in business-type activities by \$211.6 million primarily due to unemployment compensation revenues exceeding related claims by \$174.9 million. The increase of \$166.0 million in unrestricted net assets of governmental activities was primarily due to an increase in the unrestricted carry-forward balances in the General Fund of \$202.7 million less decreases in carry-forward balances of other government funds. The increase of \$100.0 million in unrestricted net assets of business-type activities was the result of normal operations and is primarily due to the State adding additional capital to the loan funds from mineral lease revenues and sales taxes. Net assets of business-type activities generally can be used only to finance the business-type activities' ongoing operations.

Percent change in total net assets from prior year	14.9 %		18.0 %		15.3 %	

The largest component of the State's net assets, 62.4 percent, reflects investments in capital assets (e.g., land, buildings, equipment, roads, and other infrastructure) less the outstanding debt issued to finance those assets. As capital assets, these resources are not available for future spending, nor can they be readily liquidated to pay off their related liabilities. Resources needed to repay capital-related debt must be provided from other sources.

Restricted net assets comprise 25.1 percent of total net assets and are subject to constitutional, legal, or external constraints on how they can be used. Net assets that are restricted by the *Constitution of Utah* include income and corporate taxes that can be used only for public and higher education costs and for motor fuel taxes that can be used only for transportation expenses.

The remaining balance of unrestricted net assets may be used to meet the State's ongoing obligations, though certain laws and internally imposed designations of resources further limit the purposes for which many of those net assets may be used.

The schedule and charts that follow summarize the State's total revenues, expenses, and changes in net assets for fiscal year 2006.

Changes in Net Assets

This year the State received 55.6 percent of its revenues from state taxes and 30.0 percent of its revenues from grants and contributions, mostly from federal sources. In the prior year, state taxes accounted for 54.3 percent and grants and contributions were 31.4 percent of total revenues. Charges for goods and services such as licenses, permits, liquor sales, state parks, and court fees, combined with other miscellaneous collections, comprised 14.4 percent of total revenues in fiscal year 2006, compared with 14.3 percent in fiscal year 2005.

Governmental Activities

The State's total governmental revenues from all sources increased \$1.384 billion or 17.8 percent. Tax revenues increased \$951.1 million or 21.0 percent. This increase in taxes reflects a continued improvement in economic conditions and is similar to the increase at the fund level. However, due to differences in measurement focus, timing of collections, and lack of historical accrued tax information, the increase at the government-wide level should not be used to predict future increases at the fund statement or budget level. With the exception of higher education, other significant changes in governmental activities' revenues and expenses mirror the changes in the General Fund at the fund level. For further discussion of these changes, see the section entitled "General Fund" on page 19. For fiscal year 2006, higher education expenses increased by \$115.5 million compared to the prior year, due in part to an increase of \$72.9 million spent for building projects completed for colleges and universities. An increase in general state support for higher education accounted for the balance of the increase.

The following table shows to what extent the State's governmental activities relied on taxes and other general revenues to cover all of their costs. For fiscal year 2006, state taxes and other general revenues covered 53.2 percent of expenses. The remaining \$3.550 billion or 46.8 percent of the total expenses were generated through charges for services and grants. As discussed in the "General Fund" section on page 19, federal mineral lease revenues increased significantly in fiscal year 2006. This increase was the largest single factor that caused Program Revenues to exceed Program Expenses by \$41.8 million in the general government function.

Interest on Long-term Debt	70,345	—	70,345	76,382		
Total Governmental Activities	\$ 7,577,439	\$ (3,549,845)	\$ 4,027,594	\$ 3,776,626	46.8 %	45.7 %

Business-type Activities

Operating revenues from the State's business-type activities increased \$121.7 million or 20.6 percent from the prior year. This increase is due, in part, to a \$47.6 million increase in revenues in the Student Assistance Programs, as a result of higher interest rates on student loans and an increase in revenues from federal reinsurance. Revenues in the Unemployment Compensation Fund increased \$31.3 million, as higher claims in recent years resulted in increased employer taxes. Liquor sales increased by \$20.2 million, primarily due to higher sales volume. Investment income increased \$15.9 million due to rising interest rates. Total operating expenses for the State's business-type activities increased \$29.0 million, or 7.5 percent. The increase was largely due to claims expenses increasing \$22.5 million in the Student Assistance Programs, as payments to lenders increased for guaranteed claims due to more defaults by borrowers.

All of the State's business-type activities operate from program revenues, except for the Water Loan Programs and the Agriculture Loan Fund that by law receive dedicated sales taxes and the Community Impact Loan Fund that receives federal mineral lease revenues to provide additional capital for loans. Accounting standards require unemployment taxes that are collected from employers and deposited in the Unemployment Compensation Fund be reported as charges for services rather than taxes. Therefore, taxes in the business-type activities are comprised entirely of sales taxes in the water and agriculture loan programs.

FINANCIAL ANALYSIS OF THE STATE'S GOVERNMENTAL FUNDS

Fund Balances

At June 30, 2006, the State's governmental funds reported combined ending fund balances of \$3.173 billion. Of this amount, \$1.587 billion or 50.0 percent is reserved for specific programs by state law, by external constraints, or by contractual obligations. Unspent bond proceeds, balances of restricted accounts, and agencies' nonlapsing balances are included in reserved fund balance. An additional \$1.199 billion or 37.8 percent of total fund balances has been designated through internally imposed limitations on uses of certain funds. Note 11 on page 95 provides more details about reserved and designated fund balances at June 30, 2006. The remaining \$386.9 million or 12.2 percent of fund balance is available for appropriation for the general purposes of the funds.

State of Utah Governmental Fund Balances as of June 30, 2006 (Expressed in Thousands)

	General Fund	Uniform School Fund	Transportation Fund	Transportation Investment Fund	Trust Lands Fund	Nonmajor Funds	Total
Reserved	\$ 300,497	\$ 66,474	\$ 44,961	\$ 143,490	\$ 751,024	\$ 280,634	\$ 1,587,080
Unreserved Designated	483,510	652,613	48,107	672	—	14,432	1,199,334
Unreserved Undesignated	85,129	223,302	116,817	—	—	(38,374)	386,874
Total	\$ 869,136	\$ 942,389	\$ 209,885	\$ 144,162	\$ 751,024	\$ 256,692	\$ 3,173,288
Percent change from prior year	32.90 %	131.83 %	1.86 %	(21.84)%	26.38 %	(22.07)%	33.63 %

General Fund

During fiscal year 2006, the General Fund's total fund balance increased \$215.2 million or 32.9 percent. This increase was due in large part to sales tax revenues coming in \$62.3 million greater than budgeted and to \$155.5 million being set aside in the budget and designated by the Legislature for fiscal year 2007 appropriations. In contrast, in the prior year, the Legislature designated only \$74.6 million for the next year's appropriations. The General Fund ended fiscal year 2006 with a "surplus" from unreserved and undesignated sources of \$108.5 million. State law normally requires 25 percent of the "surplus" to be transferred to the General Fund Budget Reserve Account ("Rainy Day Fund"). However, state law limits the combined totals of the General Fund Budget Reserve Account and the Education Budget Reserve Account to 6 percent of combined appropriations. As a result, \$21.9 million, or 20.2 percent was transferred to the General Fund Budget Reserve Account and included in designated fund balance. An additional \$1.4 million was carried forward by law for other purposes as designated for specific appropriation in 2007. The General Fund ended the year with \$85.1 million in unreserved/undesignated fund balance. Miscellaneous changes resulting from other designated and reserved sources account for the remaining change in fund balance. The General Fund Budget Reserve Account ended fiscal year 2006 with a balance of \$131.6 million.

Total General Fund revenues increased \$416.4 million or 10.0 percent from the prior year. Total tax collections increased \$193.1 million or 10.2 percent. The major positive changes in tax revenues were in sales tax, which increased \$156.6 million or 9.4 percent as Utah's economy continues to improve; and in oil, gas, and mining severance tax, which increased \$23.6 million or 36.4 percent. Federal funding was the largest single factor in increasing non-tax revenues for the fiscal year, as federal mineral lease revenues increased \$74.1 million or 89.7 percent, driven by higher oil prices; and federal contracts and grants climbed \$83.0 million or 4.7 percent from the prior year, driven by demand for services and higher costs.

Total General Fund expenditures increased by \$316.8 million or 7.9 percent. The increase was due in part to a 2.5 percent cost-of-living adjustment provided for state employees and increased costs for employee health and dental benefits of 11.8 and 6.0 percent, respectively. Additional market comparability wage adjustments were also provided to approximately 14,000 state employees. The balance of the increase in expenditures is evidence of a continued high demand for government services. The following areas were impacted most:

- *Health and Environmental Quality* – Total expenditures in this category jumped \$173.6 million, primarily due to increased Medicaid program costs resulting from increased caseloads and inflationary increases for Medicaid provider rates.
- *Higher Education* – Total expenditures in this category were up \$44.2 million, primarily due to additional state appropriations for employee health and dental increases, salary increases, and increases in expenditures for operations and maintenance of existing and new buildings.

In addition to the functions, for fiscal year 2006 the State's economic development function was moved from the Department of Community and Economic Development to the newly created Governor's Office of Economic Development, per HB 318, *Community and Economic Development Restructuring*, 2005 General Session. This change resulted in a shift of expenditures to the general government function of \$25.5 million in fiscal year 2006.

Budgetary Highlights – General Fund

The Legislature adopted the initial fiscal year 2006 budget during the 2005 General Session. The original General Fund budget at the start of fiscal year 2006, excluding department-specific revenue sources such as federal grants, departmental collections, and including miscellaneous transfers, was 6.1 percent higher than the final fiscal year 2005 budget. The Legislature also had to address critical and mandated program increases, such as providing the State's matching share of projected increases in caseloads and inflationary increases for the Medicaid program. Other increases included funding for higher education and increases in employee salaries and benefits.

The budget was again addressed during the 2006 General Session of the Legislature (January to March 2006). General revenue estimates had increased \$186.7 million over those adopted in the 2005 General Session primarily due to increased revenue estimates of sales and use tax. Increased revenue estimates allowed the Legislature to designate \$155.5 million of expected excess revenue for fiscal year 2007 appropriations.

Final budgets of department-specific revenue sources increased over original budgets and actual department-specific revenues increased over final budgets mostly due to an increase in federal mineral lease revenues. Final budgets for many of the departmental-specific revenue sources and related expenditures such as federal grants, departmental collections, and miscellaneous revenues, are generally revised based on actual collections. The difference between final budgeted expenditures and actual expenditures is primarily due to nonlapsing and unspent restricted funds that will be carried forward to the next year. However, \$1.7 million of unspent budgeted dollars were lapsed back to the General Fund by agencies.

Uniform School Fund

The Uniform School Fund's fund balance increased \$535.9 million or 131.8 percent from the prior year. Corporate tax receipts increased \$170.3 million or 81.4 percent compared to the prior year, individual income tax receipts increased \$377.8 million or 19.4 percent, and federal funding increased by \$27.1 million or 7.9 percent. Expenditures for public education increased by \$154.0 million or 7.1 percent, as the Legislature increased the budget for enrollment growth and for increased costs related to employee salary and benefit increases. The Uniform School Fund ended the year with a "surplus" from unreserved and undesignated sources of \$279.9 million. State law normally requires 25 percent of the "surplus" to be transferred to the Education Budget Reserve Account. However, state law limits the combined totals of the General Fund Budget Reserve Account and the Education Budget Reserve Account to 6 percent of combined appropriations. As a result, \$56.6 million or 20.2 percent was transferred to the Education Budget Reserve Account, resulting in a final unreserved and undesignated fund balance of \$223.3 million. Established by the Legislature in 2003, the Education Budget Reserve Account ended fiscal year 2006 with a balance of \$123.4 million.

Transportation Fund

The fund balance of the Transportation Fund increased \$3.8 million or 1.9 percent from the prior year. Revenues increased by \$109.2 million or 14.9 percent, primarily due to a \$55.4 million increase in federal contracts and grants and a \$23.9 million increase in charges for services. Expenditures increased by 108.8 million or 15.8 percent as a result of increased spending on federal participating highway projects.

Authorized federal funding for highway construction remains relatively stable from year to year. However, the spending of state and federal revenue reflects the timing of highway construction projects, which is impacted by a variety of circumstances such as environmental studies or weather. Also, the Department of Transportation has discretion on allocating federal funds among projects, which impacts the amount of federal revenue reported in the Transportation Fund and Transportation Investment Fund.

Transportation Investment Fund

The fund balance of the Transportation Investment Fund decreased by \$40.3 million or 21.8 percent from the prior year. Revenues in the fund increased \$33.7 million or 54.4 percent, mostly due to an increase in sales and use taxes of \$60.3 million as a result of

House Bill 1008, *Transportation Investment Act*, of the 2005 First Special Session. This bill earmarked an additional \$59.6 million from sales and use tax revenue annually for Centennial Highway projects accounted for within this fund. The increase in tax revenues was offset by a decrease in federal revenues of \$27.3 million or 83.5 percent. Expenditures in the fund increased by \$34.9 million or 24.7 percent, primarily in construction expenditures for the projects specific to this fund.

Trust Lands Fund

The fund balance of the permanent Trust Lands Fund increased by \$156.8 million or 26.4 percent due to revenues generated from land use, sales of trust lands, and investment income. The permanent fund also generated \$18.1 of cash investment earnings for the Uniform School Fund that is earmarked for distribution to local school districts. The principal in the fund is held in perpetuity with earnings restricted primarily to support public education.

FINANCIAL ANALYSIS OF THE STATE'S PROPRIETARY FUNDS

Student Assistance Programs

The Student Assistance Programs finished the year with an increase in net assets of \$20.2 million or 8.2 percent. Growth of the student loan portfolio and higher student loan interest rates accounted for most of the increase. As a result, loans receivable increased \$298.6 million or 20.5 percent over last year. Of total net assets of \$265.2 million, \$178.5 million is restricted for use within the Student Assistance Programs by bond covenants or by federal law.

Unemployment Compensation Fund

The State's unemployment rate decreased compared to the rate one year ago. The improving employment situation resulted in a \$40.2 million or 28.2 percent decrease in benefit payments from the prior year. For the second consecutive year, employer taxes and other revenues exceeded benefit payments. Assets were sufficient to handle the demand for benefits, and net assets increased \$174.9 million or 34.1 percent, to \$687.1 million. The entire balance of net assets in this fund is restricted for paying unemployment benefits by state and federal law.

Water Loan Programs

The net assets of the Water Loan Programs increased \$34.2 million or 6.1 percent from the prior year. Additional capital for loans was provided from \$14.4 million in dedicated sales tax revenues and \$13.4 million in federal grants, in addition to net operating revenues in the fund. Loans receivable for the programs increased \$24.4 million or 5.1 percent over the prior year. Of total net assets of \$597.9 million, \$236.2 million is restricted for use within the Water Loan Programs by bond covenants or by federal grant requirements.

CAPITAL ASSET AND LONG-TERM DEBT ADMINISTRATION

Capital Assets

The State's capital assets increased a net \$391.4 million during the year. The change consisted of net increases in infrastructure (highways) of \$155.9 million; land and related assets of \$56.9 million; and buildings, improvements, and construction in progress of \$181.1 million. Machinery and equipment decreased a net \$2.5 million during the year. Many buildings financed by the State are actually owned by the colleges and universities, which are discrete component units of the State. Therefore, while the capital assets are on the component unit's financial statements, any outstanding debt issued by the State to finance construction of those assets is reported as a liability of the State's governmental activities. This in turn reduces unrestricted net assets. As of June 30, 2006, the State had \$31.9 million of outstanding debt related to capital assets of component units.

At June 30, 2006, the State had \$226.2 million in commitments for building projects in its capital projects funds, and \$516.5 million (\$321.6 million in the Transportation Investment Fund and \$194.9 million in the Transportation Fund) in commitments for highway construction and improvement projects. Funding for the commitments will come from existing resources in these funds and from future bond proceeds and appropriations.

The State has adopted an allowable alternative to reporting depreciation for roads and bridges (infrastructure assets) maintained by the Utah Department of Transportation (UDOT). Under this alternative method, referred to as the "modified approach," UDOT must maintain an asset management system and demonstrate that the infrastructure is being preserved at or above established condition levels. Infrastructure assets accounted for under the modified approach are not depreciated, and maintenance and preservation costs are expensed.

The State's established condition level for roads is to maintain 50 percent with a rating of "fair" or better and no more than 15

percent with a "very poor" rating. The most recent condition assessment, completed for calendar year 2005, indicated that 69.5 percent of the roads were in "fair" or better condition. Only 6.3 percent of the roads assessed were in "very poor" condition. These results reflect a slight decline from conditions in calendar year 2004, when 74.7 percent of the roads were assessed as "fair" or better, and 6.2 percent assessed were in "very poor" condition.

The State's established condition level for bridges is to maintain 50 percent with a rating of "good" and no more than 15 percent of bridges with a "poor" rating. The most recent condition assessment, completed in April 2006, indicated that 71.0 percent and 2.0 percent of bridges were in "good" and "poor" condition, respectively. These results are similar to the prior year.

During fiscal year 2006, the State spent \$431.3 million to maintain and preserve roads and bridges. This amount is 52.2 percent above the estimated amount of \$283.4 million needed to maintain these assets at established condition levels.

More information about capital assets is included in Note 8 on page 82, and more detailed information on the State's modified approach for reporting infrastructure is presented in the Required Supplementary Information on page 114.

Long-term Debt

The *Constitution of Utah* authorizes general obligation borrowing only as approved by the Legislature. The *Constitution* also limits outstanding state general obligation debt to 1.5 percent of the fair market value of all taxable property in the State, while state law further restricts outstanding state general obligation debt to no more than 45 percent of the appropriations limit. As of June 30, 2006, the State was \$385.9 million below the statutory debt limit and \$1.548 billion below the debt limit established in the *Constitution*. Revenue bonds are not backed by the general taxing authority of the State, but are payable solely from specific fees or loan repayments as pledged in the bond indentures.

State of Utah
Net Outstanding Bonded Debt as of June 30
(Expressed in Millions)

	Governmental Activities		Business-type Activities		Total Primary Government		Total Percentage Change
	2006	2005	2006	2005	2006	2005	2005 to 2006
General Obligation Bonds	\$ 1,436.8	\$ 1,587.8	\$ —	\$ —	\$ 1,436.8	\$ 1,587.8	(9.5)%
Revenue Bonds:							
State Building Ownership Auth.	295.6	311.6	38.3	31.2	333.9	342.8	(2.6)
Student Assistance Programs	—	—	2,138.1	1,544.8	2,138.1	1,544.8	38.4
Total Bonds Payable	\$ 1,732.4	\$ 1,899.4	\$ 2,176.4	\$ 1,576.0	\$ 3,908.8	\$ 3,475.4	12.5 %

The State issued no new general obligation bonds during fiscal year 2006. The State issued a total of \$642.0 million of revenue bonds. Of the revenue bonds issued, \$8.4 million was to provide for capital facility construction, and \$633.7 million was to provide capital for purchasing student loans in the Student Assistance Programs.

The State's active management of its resources has helped the State maintain its triple-A rating on general obligation bonds, the highest possible rating, and double-A rating on State Building Ownership Authority lease revenue bonds from all three national rating agencies. These ratings save millions of dollars in interest each year because the State is able to obtain very favorable interest rates on new debt. Note 10 beginning on page 86 contains more information about the State's outstanding debt.

ECONOMIC OUTLOOK AND NEXT YEAR'S BUDGET

Tax revenues are expected to increase moderately in fiscal year 2007. However, original general revenue estimates for the General Fund and Uniform School Fund for fiscal year 2007 are slightly lower than actual fiscal year 2006 revenues. This is because actual fiscal year 2006 revenues were much stronger than anticipated, creating record surpluses. The Legislature balanced the 2007 budget primarily by using anticipated 2006 carryover funds of \$460.1 million and utilizing other miscellaneous sources. The Legislature provided increased funding for Medicaid, roads and highways, public and higher education, and capital projects. The State also provided a 3.5 percent cost-of-living adjustment to all state employees. An additional 2.75 percent or 5.5 percent compensation for market comparability adjustments was also provided for certain classifications within the Department of Corrections and the Utah Highway Patrol (a division of the Department of Public Safety).

Revenue collections to date in fiscal year 2007 are in line with original estimates.

Utah's economy is expected to remain stable in the near future. The average unemployment rate is expected to decline in 2006 to 3.3 percent, down from the average 2005 rate of 4.3 percent. Taxable retail sales are expected to increase 10.0 percent by the end of 2006, and growth in personal income is expected to be 9.0 percent for the same period. Because these indicators are measured on a calendar-year basis, the impact on the State budget will not be fully realized until well into fiscal year 2007.

CONTACTING THE STATE'S DIVISION OF FINANCE

This financial report is designed to provide our citizens, taxpayers, customers, investors, and creditors with a general overview of the State's finances and to demonstrate the State's accountability for the money it receives. If you have questions about this report or need additional financial information, please contact the Division of Finance, Financial Reporting Section at (801) 538-3082 or visit our Web site at: www.finance.utah.gov.

The preceding discussion and analysis focuses on the State's primary government operations. With the exception of a few nonmajor component units, the State's component units each issue separate audited financial statements that include their respective management's discussion and analysis. Component unit statements may be obtained from their respective administrative offices or from the Utah State Auditor's Office, Utah State Capitol Complex, East Office Building, Suite E310, Salt Lake City, UT 84114.

Governmental Fund Financial Statements

General Fund

This fund is the principal operating fund of the State. It accounts for all the financial resources of the general government except those required to be accounted for in another fund.

Uniform School Fund

This fund is maintained to account for revenues and expenditures that mainly support public elementary and secondary schools and the State Office of Education.

Transportation Fund

This fund is maintained to account for revenues and expenditures associated with highway construction and maintenance. Principal funding is provided from dedicated highway user taxes and fees and federal funds.

Transportation Investment Fund

This fund was created by the Legislature to account for revenues and expenditures associated with the maintenance and reconstruction of state and federal highways and designates Centennial Highway projects to be accounted for within this fund. Funding is provided from federal funds, highway general obligation bonds, registration fees, sales and use taxes, and appropriations.

Trust Lands

This permanent fund accounts for land grants and the sale of lands received from the federal *Enabling Act*. The principal in the fund is perpetual, with the earnings used primarily to support public education.

Nonmajor Funds

Nonmajor governmental funds are presented by fund type beginning on page 120.

Reconciliation of the Balance Sheet — Governmental Funds To the Statement of Net Assets

June 30, 2006

(Expressed in Thousands)

Total Fund Balances for Governmental Funds \$ 3,173,288

Total net assets reported for governmental activities in the Statement of Net Assets
is different because:

Capital assets used in governmental activities are not financial resources and
therefore are not reported in the funds: (See Note 8)

Land and Related Non-depreciable Assets	\$ 795,975	
Infrastructure, Non-depreciable	7,702,596	
Construction-In-Progress	803,815	
Buildings, Equipment, and Other Depreciable Assets	1,491,613	
Accumulated depreciation	<u>(620,101)</u>	10,173,898

Some of the State's earned revenues will be collected after yearend, but are not
available soon enough to pay for the current period's expenditures, and therefore
are deferred in the funds. 438,885

Internal service funds are used by management to charge the costs of certain
activities, such as insurance, information technology, and fleet operations to
individual funds. The assets and liabilities of the internal service funds are included
in governmental activities in the Statement of Net Assets. 74,599

Bond issue costs are reported as current expenditures in the funds. However, issue
costs are deferred and amortized over the life of the bonds and are included in the
governmental activities in the Statement of Net Assets. 3,279

Long-term liabilities and related accrued interest are not due and payable in the
current period and therefore are not reported in the funds: (See Note 10)

General Obligation and Revenue Bonds Payable	(1,669,660)	
Unamortized Premiums	(83,287)	
Amount Deferred on Refunding	21,479	
Accrued Interest Payable	(1,556)	
Compensated Absences	(148,762)	
Capital Leases	(19,644)	
Contracts Payable	<u>(7,292)</u>	<u>(1,908,722)</u>

Total Net Assets of Governmental Activities \$ 11,955,227

**Reconciliation of the Statement of Revenues, Expenditures, and Changes in Fund Balances —
Governmental Funds To the Statement of Activities**

For the Fiscal Year Ended June 30, 2006

(Expressed in Thousands)

Net Change in Fund Balances – Total Governmental Funds	\$ 798,663
--	------------

The change in net assets reported for governmental activities in the Statement of Net Assets is different because:

Governmental funds report capital outlays as expenditures. However, in the Statement of Activities, the cost of those assets is allocated over their estimated useful lives as depreciation expense. The primary government also constructs buildings for component units. When the buildings are completed they are “transferred” to component units and are reported as expenses in the Statement of Activities. This is the amount by which capital outlays \$541,185 exceeded depreciation \$(51,617) and buildings “transferred” to component units \$(91,471) in the current period. (See Note 8)	398,097
---	---------

In the Statement of Activities, only the gain on the sale of assets is reported, whereas in the governmental funds, the proceeds from the sales increase financial resources. Thus, the change in net assets differs from the change in fund balance by the cost of the assets sold.	(9,772)
---	---------

Net effect of revenues reported on the accrual basis in the Statement of Activities that do not provide current financial resources and thus are not reported as revenues in the funds until available.	194,429
--	---------

Internal service funds are used by management to charge the costs of certain activities, such as insurance, information technology, and fleet operations, to individual funds. The net revenue (expense) of the internal service funds is reported with governmental activities.	8,182
---	-------

Bond proceeds and capital leases provide current financial resources to governmental funds by issuing debt which increases long-term liabilities in the Statement of Net Assets. Repayments of bond and capital lease principal are expenditures in the governmental funds, but reduce liabilities in the Statement of Net Assets: (See Note 10)

Payment of Bond Principal	\$ 152,746	
Capital Lease Payments	<u>1,287</u>	154,033

Expenditures are recognized in the governmental funds when paid or due for: items not normally paid with available financial resources; interest on long-term debt unless certain conditions are met; and bond issue costs. However, the Statement of Activities is presented on the accrual basis and expenses and liabilities are reported when incurred, regardless of when financial resources are available or expenditures are paid or due. This adjustment combines the net changes of the following balances:

Compensated Absences Expenses	(8,733)	
Accrued Interest on Bonds Payable	81	
Amortization of Bond Premiums	18,041	
Amortization of Amount Deferred on Refunding	(3,810)	
Deferred Bond Issue Costs	(674)	
Contracts Payable Payments	<u>711</u>	<u>5,616</u>

Change in Net Assets of Governmental Activities	<u><u>\$ 1,549,248</u></u>
---	----------------------------

The Notes to the Financial Statements are an integral part of this statement.

Proprietary Fund Financial Statements

Student Assistance Programs

These programs are comprised of two programs administered by the State Board of Regents: the Utah Higher Education Assistance Authority Student Loan Guarantee Program and the Student Loan Purchase Program. The purpose of these programs is to guarantee the repayment of student loans made by participating lenders to eligible student borrowers and to make loans to, and purchase the loans of, qualified students attending eligible institutions of higher education. Funds are acquired from the sale of bonds, lines-of-credit, variable rate demand notes, and financing agreements with the Student Loan Marketing Association.

Unemployment Compensation Fund

This fund pays claims for unemployment to eligible recipients and is funded through employer contributions and reimbursements, and federal grants.

Water Loan Programs

These programs provide loans to local governments, water districts, and other entities for the purpose of upgrading water storage facilities and other related structures. Capital for this fund has been provided from the General Fund or from general obligation bonds that have been repaid from general tax revenues. Additional funds have been generated by issuing revolving fund recapitalization revenue bonds that were secured by notes receivable and repaid from the collection of these notes.

Nonmajor Funds

Nonmajor enterprise funds are presented beginning on page 144.

Governmental Activities – Internal Service Funds

These funds are maintained to account for the operation of state agencies that provide goods or services to other state agencies and other governmental units on a cost-reimbursement basis. These funds are presented in more detail beginning on page 154.

Fiduciary Fund Financial Statements

Pension Trust Funds

These funds are used to account for the activities of the Utah Retirement Systems.

Investment Trust Fund

This fund is used to account for the investments related to external participants in the Utah State Public Treasurer's Investment Fund.

Private Purpose Trust Funds

These funds are used to report resources of all other trust arrangements under which principal and income benefit individuals, private organizations, or other governments.

Agency Funds

Agency funds account for assets held by the State as an agent for other governmental units, other organizations, or individuals.

Individual funds are presented by fund type beginning on page 164.

Component Unit Financial Statements

Utah Housing Corporation

The Corporation was created to provide an alternative source of funding for home mortgages, particularly for lower income families. It is funded entirely through the issuance of bonds, which are repaid from the interest and principal payments made on mortgages.

Public Employees Health Program

This Program provides employee medical and other insurance services predominantly for agencies of the State. It also provides claims processing and insurance services for local governments and other public entities within Utah.

University of Utah and Utah State University

These universities are funded through state appropriations, tuition, federal grants, and private donations and grants. In addition to instruction, these universities provide research and other services. The operations of the University of Utah also include its hospital and clinics.

Nonmajor Component Units

Nonmajor component units are presented beginning on page 176.

NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accounting policies of the State of Utah conform in all material respects with generally accepted accounting principles (GAAP) as prescribed by the Governmental Accounting Standards Board. Preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from those estimates.

A. Reporting Entity

For financial reporting purposes, the State of Utah reporting entity includes the “primary government” and its “component units.” The primary government includes all funds, agencies, boards, commissions, and authorities that are considered an integral part of the State’s activities. The State’s component units are legally separate organizations for which the State’s elected officials are financially accountable.

The Governmental Accounting Standards Board (GASB) has set forth criteria to be considered in determining financial accountability. These criteria include appointing a voting majority of an organization’s governing body and either: (1) the ability of the State to impose its will on that organization or; (2) the potential for the organization to provide specific financial benefits to, or impose specific financial burdens on the State. Where the State does not appoint a voting majority of an organization’s governing body, GASB standards require inclusion in the reporting entity if an organization is fiscally dependent on the State, its resources are held for the direct benefit of the State or can be accessed by the State, or the relationship is such that it would be misleading to exclude it.

Except where noted below, the State’s component units issue their own separate audited financial statements as special-purpose governments engaged only in business-type activities. These financial statements can be obtained from their respective administrative offices or from the Utah State Auditor’s Office, PO Box 142310, Salt Lake City, UT 84114.

Entities such as the local school districts and local authorities of various kinds that may only partially meet the criteria for inclusion in this report have not been included. (The State’s support of the public education system is reported in the Uniform School Fund, a special revenue fund.)

Blended Component Units

Blended component units provide services entirely or almost entirely to the primary government. GASB standards require this type of component unit to be reported as part of the primary government and blended into the appropriate funds.

Utah State Building Ownership Authority (blended with the primary government’s debt service and capital projects funds) — The Authority was created by the Legislature as a body politic and corporate for the purpose of financing, owning, leasing and operating facilities to meet the needs of state government. It is comprised of three members: the Governor or designee, the State Treasurer and the Chair of the State Building Board. Separate financial statements are not required or issued for the Authority.

Discrete Component Units

Discretely presented component units are reported in a separate column and/or rows in each of the government-wide statements to emphasize that they are legally separate from the State. The Governor appoints at least a majority of the governing board members of each of the State’s component units, subject in most cases to approval by the Senate. The Utah Housing Corporation is included in the reporting entity because of its ability to issue moral obligation debt of the State and low-income housing tax credits. The other component units are included in the reporting entity because under the criteria established by GASB, the State has the ability to impose its will on these organizations. The colleges and universities, the Public Employees Health Program, Comprehensive Health Insurance Pool and the Schools for the Deaf and Blind are included as component units due to the level of oversight provided by the State. The Governor-appointed board members of the remaining component units can be replaced at will.

The State’s major discrete component units are:

Utah Housing Corporation — The Corporation issues bonds to provide capital for housing and home mortgages, especially for low and moderate-income families. Operations are financed from bond proceeds and from mortgage and investment interest and fees.

Public Employees Health Program — This Program provides employee medical and other insurance services predominantly for agencies of the State. It also provides claims processing and insurance services for local governments and other public entities within Utah. The Program is administered by the Utah State Retirement Board.

University of Utah and Utah State University — These universities are funded primarily through state appropriations, tuition, federal grants, and private donations and grants. In addition to instruction, these universities provide research and other services. The operations of the University of Utah also include its hospital and clinics.

The State’s nonmajor discrete component units are:

Comprehensive Health Insurance Pool — The Pool is a nonprofit quasi-governmental entity established within the State Insurance Department. It provides access to health insurance coverage for residents of the State who are considered uninsurable.

Utah Schools for the Deaf and the Blind — These Schools provide practical education to individuals with hearing and/or vision impairments. Although not required, these Schools issue separate but unaudited financial statements.

Heber Valley Historic Railroad Authority — The Authority is an independent state agency that maintains and operates a scenic and historic railroad in and around the Heber Valley. The Authority has a separate compilation report, but separate audited financial statements are not required or issued for it.

Utah State Fair Corporation — This is a nonprofit public corporation that operates the State Fair Park and conducts the Utah State Fair and other various expositions and entertainment events. It receives state appropriations for operations and working capital.

Colleges and Universities — Weber State University, Southern Utah University, Salt Lake Community College, Utah Valley State College, Dixie State College of Utah, College of Eastern Utah, Snow College, and the Utah College of Applied Technology. Separate audited financial statements are not required or issued for the Utah College of Applied Technology; however, its significant branch campuses each issue separate audited financial statements.

Fiduciary Component Units

Utah Retirement Systems (pension trust funds) — Utah Retirement Systems administers pension funds for various public employee retirement systems and plans of the State and its political subdivisions. Utah Retirement Systems is an independent state agency subject to legislative and executive department budgetary examination and comment. The Utah State Retirement Board, a seven-member board is established by statute to administer the systems and plans, and to serve as investment trustees of the funds. Six members are appointed by the Governor with the advice and consent of the Senate, while the State Treasurer serves as the seventh member. Because of the State's trustee responsibilities for these systems and plans, GAAP requires them to be reported as pension trust funds of the primary government rather than discrete component units. In accordance with GAAP, fiduciary funds and component units that are fiduciary in nature are excluded from the government-wide financial statements.

Related Organization (Excluded from Financial Statements)

Workers' Compensation Fund — This Fund is a nonprofit quasi-public corporation created by the Legislature for a public purpose that provides workers' compensation insurance to private and public employers. The Governor appoints six of the Fund's seven board of directors, but the State's financial accountability for the Fund does not extend beyond making the appointments.

B. Government-wide and Fund Financial Statements

Government-wide Financial Statements

The Statement of Net Assets and Statement of Activities report information on all nonfiduciary activities of the primary government and its component units. Primary government activities are distinguished between *governmental* and *business-type* activities. Governmental activities generally are financed through taxes, intergovernmental revenues, and other non-exchange revenues. Business-type activities are financed in whole or in part by fees charged to external parties for goods or services.

The Statement of Net Assets presents the reporting entities' non-fiduciary assets and liabilities, with the difference reported as net assets. Net assets are restricted when constraints placed upon them are either externally imposed or are imposed by constitutional provisions or enabling legislation.

The Statement of Activities demonstrates the degree to which the direct expenses of a given function or segment is offset by program revenues. Direct expenses are those that are clearly identifiable within a specific function. The State does not allocate general government (indirect) expenses to other functions. Program

revenues include: (1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function; and (2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function. Taxes and other revenues not meeting the definition of program revenues are reported as general revenues.

Fund Financial Statements

Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, even though the latter are excluded from the government-wide statements. For governmental and proprietary funds financial statements, the emphasis is on major individual governmental and enterprise funds, with each displayed in a separate column. All remaining governmental and enterprise funds are aggregated and reported as nonmajor funds. Internal service funds are also aggregated and reported in a separate column on the proprietary funds financial statements.

C. Measurement Focus, Basis of Accounting, and Financial Statement Presentation

Government-wide Financial Statements

The government-wide financial statements are prepared using the economic resources measurement focus and the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded when the related liability is incurred, regardless of the timing of the cash flows. Nonexchange transactions, in which the State receives value without directly giving equal value in exchange, include taxes, grants, and donations. Tax revenue is recognized in the fiscal year in which the related sales, wages, or activity being taxed occurred. Revenue from grants and donations is recognized in the fiscal year in which all eligibility requirements have been met.

Governmental Fund Financial Statements

The governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collected within the current period or expected to be collected soon enough thereafter to pay liabilities of the current period. For this purpose, the State generally considers taxes and other revenues to be available if the revenues are collected within 45 days after yearend. An exception to this policy is federal grant revenues, which generally are considered to be available if collection is expected within 12 months after yearend.

Expenditures are generally recorded when the related liability is incurred, as under the accrual basis of accounting. However, expenditures for principal and interest on long-term debt are recorded when due or when amounts have been accumulated in the debt service fund for payments of interest to be made early in the following year. Also, expenditures and related liabilities for compensated absences, postemployment benefits, and claims and judgments are recorded only to the extent they have matured (come due for payment).

Major Governmental Funds — The State reports the following major governmental funds:

- **General Fund.** This fund is the principal operating fund of the State. It accounts for all financial resources of the general government, except those required to be accounted for in another fund.
- **Uniform School Fund.** This special revenue fund accounts primarily for revenues and expenditures that support public elementary and secondary schools in the State.
- **Transportation Fund.** This special revenue fund accounts for revenues and expenditures associated with highway construction and maintenance.
- **Transportation Investment Fund.** This special revenue fund accounts for revenue and expenditures associated with Centennial Highway projects and other specific highway projects.
- **Trust Lands Fund.** This is a permanent fund that accounts for land grants and the sale of such lands received from the federal *Enabling Act*. The principal in the fund is perpetual, with the earnings used primarily to support public education.

Nonmajor Governmental Funds — The State's nonmajor governmental funds include other special revenue funds, capital projects funds, and debt service funds. The nonmajor special revenue funds account for specific revenue sources that are legally restricted to expenditures for specific purposes. Examples include tobacco settlement monies, environmental activities, crime victim reparations and rural development programs. The capital projects funds account for the resources used for the acquisition, construction, or improvement of capital facilities other than those financed by proprietary funds. The debt service funds account for resources used for the payment of interest and principal on general long-term debt obligations.

Proprietary Fund Financial Statements

The financial statements of the proprietary funds are reported using the economic resources measurement focus and the accrual basis of accounting, similar to the government-wide financial statements described previously. Proprietary funds include both enterprise and internal service fund types. Enterprise funds report the activities for which fees are charged to external users for goods or services. Internal service funds account for goods and services provided primarily to other agencies or funds of the State, rather than to the general public.

Reporting for business-type activities and enterprise funds follow all GASB pronouncements, and all Financial Accounting Standards Board (FASB) pronouncements issued on or before November 30, 1989, except those that conflict with a GASB pronouncement.

Proprietary funds distinguish operating revenues and expenses from nonoperating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. Revenues and expenses not meeting this definition, such as subsidies and investment earnings, are reported as nonoperating.

Major Enterprise Funds — The State reports the following major enterprise funds in its proprietary fund statements:

- **Student Assistance Programs.** These programs make loans to, and purchase loans of, qualified students attending eligible higher education institutions. The programs also guarantee the repayment of student loans made by participating lenders to eligible students.
- **Unemployment Compensation Fund.** This fund pays claims for unemployment to eligible recipients.
- **Water Loan Programs.** This fund provides loans to local governments, water districts, and other entities for the purpose of upgrading water storage facilities and other related structures.

Nonmajor Enterprise Funds — The State's nonmajor enterprise funds include loan programs for communities, low-income housing, agricultural and other purposes; Alcoholic Beverage Control (state liquor stores); Utah Correctional Industries; State Trust Lands Administration; and the Utah Dairy Commission.

Internal Service Funds — The State also reports the internal service fund type in the proprietary funds statements. The activities accounted for in internal service funds include technology services, fleet operations, risk management, copy and mail services, debt collection, property management, and transportation infrastructure. In the government-wide financial statements, internal service funds are included with governmental activities.

Fiduciary Fund Financial Statements

The fiduciary funds account for assets held by the State in a trustee capacity or as an agent for other individuals or organizations. The fiduciary fund financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. The following fiduciary fund types are reported:

Pension Trust Funds — These funds account for the transactions, assets, liabilities, and fund equity of the retirement systems and plans administered by Utah Retirement Systems.

Investment Trust Fund — This fund is used to account for the investments related to external participants in the Utah State Public Treasurer's Investment Fund.

Private Purpose Trust Funds — These funds report resources of all other trust arrangements in which principal and income benefit individuals, private organizations or other governments. Examples include the Utah Navajo Nation Trust, Unclaimed Property Trust, Employers' Reinsurance Trust, Petroleum Storage Tank Trust, and the Utah Educational Savings Plan Trust.

Agency Funds — These funds account for assets held by the State as an agent for other governmental units, other organizations, or individuals. These funds include fines, forfeitures, tax collections, and withholding taxes for employees.

Component Unit Financial Statements

The combining component unit financial statements are presented in order to provide information on each of the major component units included in the component unit's column of the government-wide statements. The component unit financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. The information is presented in order to be consistent with the government-wide statements, and is less detailed than the presentation in each component unit's separately issued financial statements. The component units follow all GASB pronouncements, and all FASB pronouncements issued on or before November 30, 1989, except those that conflict with a GASB pronouncement. In addition, as allowed by GASB standards, the Public Employees Health Program has elected to apply all applicable FASB pronouncements issued after November 30, 1989, that do not conflict with GASB standards.

D. Fiscal Yearends

All funds and discretely presented component units are reported using fiscal years which end on June 30, except the pension trust funds (fiduciary funds) and the Utah Dairy Commission (nonmajor enterprise fund), which have fiscal years ending December 31.

E. Assets, Liabilities, and Net Assets/Fund Balances

Cash and Cash Equivalents and Investments

Cash equivalents are generally considered short-term, highly liquid investments with a maturity of three months or less from the purchase date. The Student Assistance Programs (enterprise fund) use a trustee for their long-term investing needs, and they consider any cash and cash equivalents held by their trustee as investments.

All cash deposited with the State Treasurer by state entities is maintained by the Treasurer in various pooled investment funds. The State Treasurer invests the deposited cash, including the cash float, in short-term securities and other investments. All interest revenue is allocated to the General Fund unless state law or trust agreements require allocations of interest to other funds. Funds authorized to receive interest earnings are segregated into separate investment pools, and interest is allocated based on cash balances in the pool.

Investments (including cash equivalents) are under the control of the State Treasurer or other administrative bodies as determined by law. In certain instances, investments may be restricted by law or other legal instruments. Investments are presented at fair value. The fair value of investments is based on published prices and quotations from major investment brokers at current exchange rates, as available. For investments where no readily ascertainable fair value exists, management, in consultation with their investment advisors, have determined the fair values for the individual investments. Investments held as security deposits which are not held for investment purposes are carried at cost. The Utah Retirement Systems' (pension trust funds) mortgages are valued on an amortized cost basis which approximates fair value, and the fair value of real estate investments has been estimated based on independent appraisals.

The State's Unemployment Compensation Fund (enterprise fund) monies are required by the Social Security Act to be invested in the

U.S. Department of Treasury, Bureau of Public Debt Unemployment Trust Fund (BPDUTF), which is not registered with the SEC. The fair value of the position in the BPDUTF is the same as the value of the BPDUTF shares.

Utah Retirement Systems (pension trust funds) held four types of derivative financial instruments at yearend: futures, currency forwards, options, and swaps. Futures contracts are traded on organized exchanges to minimize credit risk. Currency forwards are entered into in order to hedge the exposure to changes in foreign currency exchange rates on foreign currency dominated portfolio holdings. Utah Housing Corporation (major component unit) enters into various rate swap contracts in order to increase funding capabilities. The Corporation sells variable rate bonds and minimizes the inherent risk with the use of floating-to-fixed interest rate swap contracts. See Note 3 for additional information about derivatives.

Receivables

Accounts receivables in the governmental and business-type activities consist mainly of amounts due from the Federal Government, customers, and others. Receivables from the Federal Government are reasonably assured; accordingly, no allowance for uncollectible accounts has been established.

Notes/mortgages receivable for governmental and business-type activities are primarily long-term loans for local governments and agricultural development, home mortgages, and individual student loans. The interest rates on the loans vary but are generally lower than market rates and, in some cases, are non-interest bearing. Student loans in the Student Assistance Programs (business-type activities) are fixed and variable rate federally insured loans. Student loans are insured at 95 to 100 percent of their principal balance depending on the date disbursed.

Accrued taxes include receivables for taxpayer-assessed taxes where the underlying exchange has occurred in the period ending June 30 or prior, net of applicable estimated refunds and allowances.

Note 5 provides a disaggregation of governmental and business-type receivables, including a breakout of current/noncurrent balances and established allowances.

Inventories and Prepaid Items

Proprietary funds and component units inventories are valued at the lower of cost or market. Cost evaluation methods include first-in-first-out (FIFO), last-in-first-out (LIFO), average cost, weighted average, weighted moving average, and retail inventory method.

Governmental fund inventories are recorded as expenditures when purchased except for Transportation Fund inventories that are recorded as expenditures when consumed. Transportation Fund inventories are valued using a weighted average cost.

Prepaid items related to governmental funds are immaterial and recorded as expenditures in the governmental funds financial statements when paid.

Prepaid items for the Student Assistance Programs (enterprise fund) are primarily guarantor insurance premiums charged at the time loan proceeds are disbursed and are amortized over the estimated lives of

the loans using a method which approximates the interest method of amortization.

Capital Assets

Capital assets, which include land, buildings, equipment, and infrastructure (roads, bridges, drainage systems, lighting systems, and similar items), are reported in the applicable governmental or business-type activities columns, or in the component units column on the government-wide Statement of Net Assets. Capital assets of proprietary funds and fiduciary funds are also recorded in their respective fund statements. Capital assets, with the exception of infrastructure, are defined by the State as assets, which cost \$5 thousand or more when acquired and have an estimated useful life greater than one year. Infrastructure assets are capitalized if the cost is over \$1 million. Purchased or constructed capital assets are recorded at cost or at estimated historical cost where historical cost is not available. Donated fixed assets are valued at their estimated fair value at the date of donation.

Capital assets purchased by governmental funds are recorded as expenditures in the governmental fund financial statements. Interest expense for capital asset construction related to governmental activities is not capitalized. Interest expense incurred during construction of capital facilities related to business-type activities and component units is immaterial and is not capitalized in all cases.

Buildings, equipment, and other depreciable assets are depreciated using the straight-line method over the following estimated useful lives:

Asset Class	Years
Equipment	3–15
Aircraft and Heavy Equipment	5–30
Buildings and Improvements	30–40
Land Improvements	5–20
Infrastructure	15–80

As provided by GASB standards, the State has elected to use the “modified approach” to account for infrastructure assets (roads and bridges) maintained by the State’s Department of Transportation. This includes infrastructure acquired prior to fiscal year 1981. Under this approach, depreciation expense is not recorded and only improvements that expand the capacity or efficiency of an infrastructure asset are capitalized. Using this approach requires the State to: (1) maintain an inventory of the assets and perform periodic condition assessments; (2) estimate each year the annual amount to maintain and preserve the assets at the condition level set by the State; and (3) document that the assets are being preserved approximately at or above the condition level set by the State. Other infrastructure, which is primarily maintained by the Department of Natural Resources, is capitalized and depreciated.

Most works of art and historical treasures are not capitalized or depreciated. These assets are held for public exhibition, education, or research rather than financial gain. These assets are also protected, unencumbered, and preserved and subject to policies requiring the proceeds from sales of collection items to be used to acquire other collection items. The State’s assets of this nature include the State Fine Art Collection, photographs, prints, paintings, historical documents and artifacts, monuments, statues, and paleontological and archaeological collections.

Accrued Liabilities

Accrued liabilities include the liability for employee payrolls and liabilities accruing over time where demand for payment is due shortly after fiscal yearend. See Note 6 for additional information about accrued liabilities.

Deferred Revenue — Unearned and Unavailable

In the government-wide statements, proprietary fund statements, and fiduciary fund statements, unearned revenue is recorded when cash or other assets are received prior to being earned. In the governmental fund statements, deferred revenue is recorded when revenue is either unearned or unavailable. Deferred revenues for the Student Assistance Programs (enterprise fund) are primarily guarantee fees that are recognized as income over a period of ten years using the sum-of-the-years-digits method.

Policy Claims Liabilities

Policy claims liabilities are for insurance claims incurred prior to the reporting date and are based on actuarial estimates. Policy claims liabilities for Unemployment Insurance are for claims filed as of the reporting date. A substantial portion of policy claims liabilities is long-term in nature. Therefore, claims liabilities are reported as long-term liabilities on the Statement of Net Assets.

Long-term Debt

In the government-wide financial statements and proprietary fund financial statements, long-term debt and other long-term obligations are reported as liabilities. Bond premiums and discounts, deferred amount on refunding, as well as issuance costs, are deferred and amortized over the life of the bonds using the bonds outstanding method or straight-line method, which approximates the effective interest method. Bonds payable are reported net of the applicable bond premium or discount and deferred amount on refunding. Bond issuance costs are reported as deferred charges (assets).

In the governmental fund financial statements, bond premiums and discounts, as well as bond issuance costs, are recognized during the current period. The face amount of debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources while discounts on debt issuances are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as debt service expenditures.

The *Tax Reform Act of 1986* requires governmental entities issuing tax-exempt bonds to refund to the U.S. Treasury interest earnings on bond proceeds in excess of the yield on those bonds. Governmental entities must comply with arbitrage rebate requirements in order for their bonds to maintain tax-exempt status. Entities are required to remit arbitrage rebate payments for non-purpose interest to the federal government at least once every five years over the life of the bonds. Federal regulations also require the Student Assistance Programs (enterprise fund) to keep the yield on student loans within a designated percentage of the interest cost of the related tax-exempt borrowing. One method of reducing this yield is to make yield reduction payments to the United States Treasury. Estimated yield reduction payments may be made by the end of the tenth year and every fifth year thereafter during the life of the bonds. Some State of

Utah bonds may be exempt from the rebate requirements if they meet certain statutory exceptions per the regulations.

Arbitrage liability is treated as an expense in the government-wide Statement of Net Assets and the proprietary fund financial statements when the liability is recognized. Arbitrage liability is recorded as an expenditure in the governmental funds financial statements when the liability is due. At June 30, 2006, the total estimated arbitrage rebate liability in the Student Assistance Programs (enterprise fund) was \$67.845 million, of which \$66.881 million represents yield reduction payments and \$965 thousand represents the estimated liability for non-purpose interest. Other arbitrage liabilities are immaterial.

Compensated Absences and Leave/Postemployment Benefits

Employees' vacation leave is accrued at a rate of four hours every two weeks for the first five years of employment, and grows to a rate of seven hours every two weeks after 20 years of employment. There is no requirement to use vacation leave, but a maximum of 40 days may be carried forward at the beginning of each calendar year. Unused vacation leave is paid to employees upon termination. Employees who have a sick leave balance in excess of 144 hours at the beginning of a calendar year are eligible to "convert" up to 40 hours of sick leave if less than that amount is used during the year. Employees may use converted sick leave in place of annual leave. Any balance in converted sick is paid to employees upon termination. This converted sick leave program ends on January 1, 2014. The total liability of the governmental activities for compensated absences is recorded in the government-wide Statement of Net Assets as part of long-term liabilities. However, in accordance with GAAP, the liability is not recorded in the governmental funds financial statements. See Note 10 for additional information about the liability.

Employees earn sick leave at a rate of four hours for each two-week period, with no limit to the amount that can be accumulated. The State does not reimburse employees for unused sick leave upon termination unless employees are eligible for retirement or the sick leave is "converted". Sick leave is expended when used.

At retirement, for participating agencies, an employee receives 25 percent of the value of unused accumulated sick leave as a mandatory employer contribution into a 401(k) account. Each day of remaining sick leave is *either* used to purchase one month of health and life insurance coverage or Medicare supplement (if earned prior to January 1, 2006), *or* converted to a value and placed in a health reimbursement account (if earned on or after January 1, 2006). Regardless of the unused sick leave balance, the State will pay for premiums to maintain health and life insurance coverage for up to five years or until the employee reaches age 65, whichever comes first. However, as of January 1, 2006, this part of the program will be phased out over the next five years. See Note 17 for additional information about postemployment benefits.

The State maintains compensated absences pools and postemployment benefit pools within the General Fund, Uniform School Fund, and Transportation Fund. The ongoing payments from the pools are provided by charges to agency budgets as benefits are earned. Vacation leave taken as time off is paid from current budgets when used. Payment of leave balances at termination and payment of postemployment benefits are made from the compensated absences and postemployment benefit pools. Proprietary funds, Utah Schools for the Deaf and the Blind, and private purpose trust

funds of the primary government also participate in the pools and have no liability for leave or postemployment benefits once their contributions to the pools have been made.

Compensatory time for overtime worked may be earned up to a maximum of 80 hours. Any overtime exceeding 80 hours is paid when earned. In accordance with GAAP, compensatory time is expended when the leave is taken in governmental funds, but is expensed when earned for budgetary purposes.

Vacation earnings, sick leave earnings, and postemployment benefits policies vary slightly among component units and from the primary government's policies. Vacation leave is expended when earned and sick leave is expended when used.

Net Assets/Fund Balances

The difference between assets and liabilities is "Net Assets" on the government-wide, proprietary fund, and fiduciary funds financial statements, and "Fund Balance" on the governmental fund financial statements.

In the governmental fund financial statements, fund balances are classified as reserved, designated, or unreserved. Reserves represent those portions of fund balance not appropriable for expenditure or legally segregated for a specific future use. Designated fund balances represent tentative plans for future use of financial resources.

F. Revenues and Expenditures/Expenses

When an expenditure/expense is incurred for purposes for which both restricted and unrestricted resources are available, it is the State's general policy to use restricted resources first. However, the State has some programs that are funded by appropriations from both unrestricted resources and resources required by law to be deposited in a specific subfund for a specific purpose (which may include restricted resources). In those instances, it is the State's policy to expend those resources proportionally based on the amounts appropriated from each source.

Grants

Federal grants and assistance awards made on the basis of entitlement periods are recorded as revenues when entitlement occurs. All federal reimbursement-type grants are recorded as revenues when the related allowable expenditures are incurred and all applicable eligibility requirements are met.

Federal grants include nonmonetary transactions for food and vaccine commodities. Commodities revenue and expenditures are valued at their federally reported value. Commodity inventories at yearend are immaterial. For the fiscal year ended June 30, 2006, the State reported revenue and expenditures of \$16.956 million for commodities in the General Fund, and \$10.005 million for commodities in the Uniform School Fund (special revenue fund).

Investment Income

Investment income includes interest, dividends and other earnings, and the change in fair value of investments. Negative investment

income is reported where the decrease in the fair value of investments due to market conditions exceeded the other components of investment income.

In accordance with state law, interest and dividend income from investments in the Trust Lands permanent fund and the Tobacco Endowment Fund (nonmajor governmental fund) is assigned to and reported directly in the Uniform School Fund and the General Fund, respectively. One half of the applicable income reported in the General Fund is then transferred back into the Tobacco Endowment Fund to increase the principal in the fund as required by state law.

Retirement and Employee Benefit Costs

Most state employees participate in a pension system and/or plan administered by Utah Retirement Systems. Contributions collected for the pension systems and plans and the retirement benefits paid are both accounted for in the Pension Trust Funds. All costs for pension, health, and federal social security contributions are reported as expenditures in the appropriate function in governmental fund types or as expenses in applicable proprietary fund types. Pension and other benefit costs are recognized in the fiscal year in which the underlying payroll cost is incurred.

G. Interfund Transactions

Government-wide Financial Statements

Interfund Activity — In general, eliminations have been made to minimize the double counting of internal activity, including internal service fund type activity. However, interfund services, provided and used between different functional categories, have not been eliminated in order to avoid distorting the direct costs and program revenues of the applicable functions. Operating transfers between governmental and business-type activities are reported at the net amount.

Interfund Balances — Interfund receivables and payables have been eliminated from the government-wide Statement of Net Assets, except for the residual amounts due between governmental and business-type activities.

Governmental Fund Financial Statements

Interfund Activity — Interfund transactions for goods sold or services rendered for a price approximating their external exchange value, and employee benefit contributions are accounted for as revenues and expenditures/expenses in the funds involved.

Transfers are used to report flows of cash (or other assets) between funds without equivalent flows of assets in return or a requirement for repayment. The State's transfers are based on legislative appropriations or other legal authority. Transfers are presented in Note 13.

NOTE 2. BEGINNING NET ASSET ADJUSTMENTS AND OTHER CHANGES

Effective July 1, 2005, the Legislature created the Transportation Investment Fund of 2005 (major governmental fund) and designated

that projects, previously reported as part of the Centennial Highway Fund (major governmental fund), be reported within this new fund. This change had no impact on governmental activities reported in the current year or previous years.

NOTE 3. DEPOSITS AND INVESTMENTS

Deposits and investments for the primary government and its discrete component units are governed by the Utah Money Management Act (*Utah Code*, Title 51, Chapter 7) and rules of the State of Utah Money Management Council. However, the Act also permits certain funds that have a long-term perspective to make investments of a long-term nature, such as equities and bond mutual funds. In the primary government these are the Tobacco Endowment (special revenue fund), Trust Lands (permanent fund), Employers' Reinsurance Trust (private purpose trust), and Utah Educational Savings Plan Trust (private purpose trust). Exempt from the Act in the primary government is the Utah Retirement Systems (pension trust funds). The discrete component units exempt from the Act are Utah Housing Corporation, Public Employees Health Program, and the college and universities' endowment funds.

A. PRIMARY GOVERNMENT

Custodial Credit Risk — Deposits

The custodial credit risk for deposits is the risk that in the event of a bank failure, the State's deposits may not be recovered. The Money Management Act requires deposits be in a qualified depository. The Act defines a qualified depository as any financial institution whose deposits are insured by an agency of the federal government and which has been certified by the State Commissioner of Financial Institutions as meeting the requirements of the Act and adhering to the rules of the Utah Money Management Council.

The deposits in the bank in excess of the insured amount are uninsured and uncollateralized. Deposits are not collateralized nor are they required to be by state statute. The deposits for the primary government at June 30, 2006, were \$337.575 million. Of these, \$334.138 million were exposed to custodial credit risk as uninsured and uncollateralized.

Investments

The Money Management Act defines the types of securities authorized as appropriate investments and the conditions for making investment transactions. Investment transactions may be conducted only through qualified depositories, certified dealers, or directly with issuers of the investment securities.

The Act authorizes investments in both negotiable and nonnegotiable deposits of qualified depositories and permitted depositories; repurchase and reverse repurchase agreements; commercial paper that is classified as "first tier" by two nationally recognized statistical rating organizations, one of which must be Moody's Investors Service or Standard & Poor's; bankers' acceptances; obligations of the United States Treasury including bills, notes, and bonds; obligations, other than mortgage derivative products, issued by U.S. government sponsored enterprises (U.S. Agencies) such as the Federal Home Loan Bank System, Federal Home Loan Mortgage Corporation (Freddie Mac), Federal National Mortgage Association (Fannie Mae), and Student Loan Marketing

Association (Sallie Mae); bonds, notes, and other evidence of indebtedness of political subdivisions of the State; fixed rate corporate obligations and variable rate securities rated "A" or higher, or the equivalent of "A" or higher, by two nationally recognized statistical rating organizations; and shares or certificates in a money market mutual fund as defined in the Act.

The Act permits investing according to the rules of the Money Management Council for certain funds with a long-term perspective and funds acquired by gift, private grant, and the corpus of funds functioning as endowments. The Council's Rule 2 allows the State to invest these funds in any of the above investments or in any of the

following, subject to satisfying certain criteria: professionally managed pooled or commingled investment funds, or mutual funds which satisfy certain criteria; common stock, convertible preferred stock or convertible bonds; corporate bonds or debentures; and alternative investments as defined in the rule.

The primary government's investments at June 30, 2006, are presented below. All investments, except those of the Utah Retirement Systems (pension trust funds), are presented by investment type and debt securities are presented by maturity. The Utah Retirement Systems are presented consistent with their separately issued financial statements by investment type.

* At June 30, 2006, the bond mutual fund had an average effective maturity of 7.2 years.

The majority of the primary government's corporate debt securities are variable-rate securities, which adjust periodically to the prevailing market interest rates. Because these securities frequently reprice, interest rate risk is substantially reduced at each periodic reset date. In the table above, variable-rate securities are presented according to the length of time until the next reset date rather than the stated maturity.

U.S. agency debt securities of \$1.6 billion owned by the primary government reset periodically and have a maximum maturity out to three years. The securities "step up" to higher interest rates at levels determined at the time of purchase. These securities are callable at par and on a quarterly basis may be called or stepped up; if held to maturity they will mature at par. In the current rising interest rate environment, some of these adjustable rate securities have not kept pace with the increase in rates as reflected in their fair market

values. In the table above, U.S. agency securities are presented according to the length of time until the next reset date rather than the stated maturity.

In addition, significant funds with a long-term investment perspective have the following mix of investments (percentages are of the fund's total investments). Utah Educational Savings Plan Trust (private purpose trust) – \$1.119 billion, 77.3 percent, in domestic equity mutual fund securities; \$227.566 million, 15.7 percent, in bond mutual fund; \$101.849 million, 7.0 percent, in international equity mutual fund securities. Trust Lands (permanent fund) – \$318.751 million, 44.3 percent, in domestic equity mutual fund securities; \$275.867 million, 38.3 percent, in bond mutual fund; and \$125.198 million, 17.4 percent, in international equity mutual fund securities.

Interest Rate Risk — Investments

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment.

The primary government's policy for managing interest rate risk is to comply with the State's Money Management Act. Section 51–7–11 of the Act requires that the remaining term to maturity of investments may not exceed the period of availability of the funds to be invested. The Act further limits the remaining term to maturity on all investments in commercial paper, bankers' acceptances, fixed rate negotiable deposits, and fixed rate corporate obligations to 270–365 days or less. In addition, variable rate negotiable deposits and variable rate securities may not have a remaining term to final maturity exceeding two years. Funds that follow Rule 2 of the Money Management Council may not allow the dollar-weighted average maturity of fixed-income securities to exceed ten years.

The Utah Retirement Systems (URS) manage their exposure to fair value loss arising from increasing interest rates by complying with the following policy:

- For domestic debt securities managers, an individual debt securities investment manager's portfolio shall have an effective duration between 75 and 125 percent of the effective duration of the appropriate index.
- The international debt securities investment managers shall maintain an effective duration of their portfolio between 50 and 150 percent of the appropriate index.

Duration is a measure of a debt investment's exposure to fair value changes arising from changes in interest rates. It uses the present value of cash flows, weighted for those cash flows as a percentage of the investment's full price.

The URS compares an investment's effective duration against the Lehman Brothers Aggregate Index for domestic debt securities and the Lehman Brothers Global Aggregate Index for international debt securities. The index range at December 31, 2005, was 3.43–5.71 for domestic debt securities and 2.64–7.93 for international debt securities. At December 31, 2005, no individual debt security investment manager's portfolio was outside of the policy guidelines. At December 31, 2005, the following tables show the investments by investment type, amount and the effective weighted duration rate.

Credit Risk of Debt Securities

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. The primary government, with the exception of the Utah Retirement Systems (URS), follows the Money Management Act as previously discussed as its policy for reducing exposure to investment credit risk.

The primary government's rated debt investments as of June 30, 2006, with the exception of URS, were rated by Standard and Poor's and/or an equivalent nationally recognized statistical rating organization and the ratings are presented below using the Standard and Poor's rating scale.

* A1 is Commercial Paper rating

The Utah Retirement Systems (URS) expects its domestic debt securities investment managers to maintain diversified portfolios by sector using the following guidelines:

- U.S. government and agency securities — no restriction.
- Total portfolio quality shall maintain a minimum overall rating of “A” (S&P) or equivalent rating.
- Securities with a quality rating of BBB– and below are considered below investment grade. No more than 5 percent of an investment manager’s assets at market with a single issuer of 1 percent of the total portfolio can be below investment grade.
- Upon approval, a domestic debt securities investment manager may invest up to 10 percent of the portfolio in non-U.S. dollar denominated bonds.

Upon approval, the international debt securities investment managers may hold up to 25 percent of the market value of their portfolios in securities rated below investment grade (S&P index BBB– or Moody’s index Baa3). The remaining assets shall have on average an investment grade rating.

The weighted quality rating average of the domestic debt securities, excluding pooled investments, at December 31, 2005, was AA+ and the fair value of below grade investments was \$51.912 million or 1.25 percent of the domestic portfolio. The weighted quality rating average of the international debt securities investments, at December 31, 2005, was AA– and the fair value of below grade investments was \$6.675 million or 0.77 percent of the international portfolio.

The following table presents the URS ratings as of December 31, 2005:

* Ratings of pooled investments were unavailable from the custodian.

** Ratings for the U.S. Government and Agencies category were unavailable from the custodian; however, securities issued by the U.S. government and its agencies are generally considered rated AAA or equivalent.

Custodial Credit Risk — Investments

Custodial credit risk for investments is the risk that, in the event of a failure of the counter party, the State will not be able to recover the value of the investment or collateral securities that are in the possession of an outside party. The primary government does not have a formal policy for custodial credit risk.

The primary government’s investments at June 30, 2006, except those of the Utah Retirement Systems, were held by the State or in the State’s name by the State’s custodial banks; except \$15.544 million of repurchase agreements where the underlying securities were uninsured and held by the investment’s counterparty, not in the name of the State.

At December 31, 2005, the Utah Retirement Systems (URS) investments were registered in the name of URS and held by their custodians except for \$20.868 million of investments that were held by the custodians not in the name of URS and \$(45.554) million of investments for which exposure to custodial credit risk could not be determined.

Concentration of Credit Risk — Investments

Concentration of credit risk is the risk of loss attributed to the magnitude of a government’s investment in a single issuer.

Except for the Utah Retirement Systems (pension trust funds), the primary government’s policy for reducing this risk of loss is to comply with the Rules of the Money Management Council. Rule 17 of the Money Management Council limits investments in a single issuer of commercial paper and corporate obligations to between 5 and 10 percent depending upon the total dollar amount held in the portfolio. Funds that follow Rule 2 of the Money Management Council are limited to investments in equity securities and fixed income corporate securities to no more than 5 percent of all funds in any one issuer and no more than 25 percent of all funds in any one industry. No more than 5 percent of all funds may be invested in securities of a corporation that has been in continuous operation for less than three years. No more than 5 percent of the outstanding voting securities of any one corporation may be held. In addition, Rule 2 limits investment concentrations in certain types of investments. The Money Management Council limitations do not apply to securities issued by the U.S. government and its agencies.

The primary government had debt securities investments at June 30, 2006, with more than 5 percent of the total investments in securities of the Federal Home Loan Bank and the Federal Home Loan Mortgage Corporation. These investments represented 13.3 percent and 6.5 percent, respectively, of investments subject to concentration of credit risk.

The Utah Retirement Systems debt securities investments had no single issuer investments that exceed their portfolio investment guidelines by sector and by issuer as follows:

- AAA/Aaa Debt Securities — no more than 5 percent of an investment manager’s assets at market with a single issuer.
- AA–/Aa3 Debt Securities — no more than 4 percent of an investment manager’s assets at market with a single issuer.

- A-/A3 Debt Securities — no more than 3 percent of an investment manager's assets at market with a single issuer.
- BBB-/Baa3 Debt Securities — no more than 2 percent of an investment manager's assets at market with a single issuer.
- For Debt Securities — no individual holding shall constitute more than 10 percent of the market value of outstanding debt of a single issuer with the exception of the U.S. government or its agencies, or collateralized mortgage obligations.
- For Domestic Equity Securities — no more than 4 percent of an investment manager's assets at market with a single issuer. Also, no more than 8 percent of an investment manager's assets shall be invested in the equity or REIT securities of any single issuer at market.
- For International Equity Securities — no more than 8 percent of an investment manager's assets at market with a single issuer.

The primary government, except the Utah Retirement Systems (pension trust funds), does not have a formal policy to limit foreign currency risk.

The Utah Educational Savings Plan Trust (private purpose trust) has \$101.849 million and the Trust Lands (permanent fund) has \$125.198 million invested in international equity funds. As such, no currency denomination is presented.

The Utah Retirement Systems (URS) manage their exposure to fair value loss by requiring their international securities investment managers to maintain diversified portfolios by sector and by issuer to limit foreign currency and security risk.

Risk of loss arises from changes in currency exchange rates. The URS exposure to foreign currency risk is presented on the following table.

Foreign Currency Risk — Investments

Foreign currency risk is the risk that changes in exchange rates will adversely affect the fair value of an investment or a deposit.

B. COMPONENT UNITS**Custodial Credit Risk — Deposits**

The custodial credit risk for deposits is the risk that in the event of a bank failure, the component unit's deposits may not be recovered.

The component units follow the Money Management Act by making deposits only in qualified financial institutions in accordance with the Act. The deposits in the bank in excess of the insured amount are uninsured and uncollateralized. Deposits are not collateralized nor are they required to be by state statute. The deposits for the component units at June 30, 2006, were \$155.570 million. Of these, \$147.578 million were exposed to custodial credit risk as uninsured and uncollateralized.

Investments

The component units follow the applicable investing criteria described above for the primary government, with the exception of Utah Housing Corporation and Public Employees Health Program which are exempt from the Money Management Act.

College and university funds from gifts, private grants, and the corpus of funds functioning as endowments are invested according to the requirements of the Uniform Management of Institutional

Funds Act (UMIFA) and State Board of Regents Rule 541, Management and Reporting of Institutional Investments (Rule 541) or separate endowment investment policies which have been approved by their Board of Trustees and by the Board of Regents. The UMIFA and Rule 541 allow the Entity to invest endowment funds (including gifts, devises, or bequests of property of any kind from any source) in any of the above investments or any of the following subject to satisfying certain criteria: professionally managed pooled or commingled investment funds registered with the Securities and Exchange Commission or the Comptroller of the Currency (e.g., mutual funds); professionally managed pooled or commingled investment funds created under 501(f) of the Internal Revenue Code which satisfy the conditions for exemption from registration under Section 3(c) of the Investment Company Act of 1940; any investment made in accordance with the donor's directions in a written instrument; and any alternative investment funds that derive returns primarily from high yield and distressed debt (hedged or non-hedged), private capital (including venture capital, private equity, both domestic and international), natural resources, and private real estate assets or absolute return and long/short hedge funds.

The component units' investments at June 30, 2006, are presented below.

Interest Rate Risk — Investments

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. The component units' policy for managing interest rate risk is the same as described above for the primary government.

Credit Risk of Debt Securities

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. The component units' policy for reducing exposure to investment credit risk is the same as described above for the primary government. The component units' debt investments as of June 30, 2006, were rated by Standard and Poor's and/or an equivalent nationally recognized statistical rating organization and the ratings are presented below using the Standard and Poor's rating scale.

Custodial Credit Risk — Investments

Custodial credit risk for investments is the risk that, in the event of a failure of the counterparty, the component units will not be able to recover the value of the investment or collateral securities that are in the possession of an outside party. The component units do not have a formal policy for custodial credit risk.

The various component units' investments at June 30, 2006, were held by the component unit or in the name of the component unit by the component unit's custodial bank or trustee, except the following which were uninsured, were not registered in the name of the component unit, and were held by (expressed in thousands):

Counterparty

U.S. Treasuries \$ 259,695

Government National

Mortgage Association \$ 18
U.S. Agencies \$ 243,923
Repurchase Agreements \$ 12,136

Counterparty's Trust Department or Agent

U.S. Treasuries \$ 5,854
U.S. Agencies \$ 1,994
Corporate Debt \$ 9,587
Municipal/Public Bonds \$ 534
Repurchase Agreements \$ 12,130

Concentration of Credit Risk — Investments

Concentration of credit risk is the risk of loss attributed to the magnitude of a government's investment in a single issuer.

Except for Utah Housing Corporation and Public Employees Health Program, the component units' policy for reducing this risk of loss is the same as described above for the primary government for non-endowment funds. For college and university endowments funds, their policy for reducing this risk of loss is to follow the Uniform Management of Institutional Funds Act (UMIFA) and State Board of Regents Rule 541, Management and Reporting of Institutional Investments (Rule 541) or separate endowment investment policies which have been approved by their Board of Trustees and by the Board of Regents.

The Utah Housing Corporation places no limit on the amount the Corporation may invest in any one issuer. More than five percent of the Corporation's investments are in Trinity Guaranteed Investment Contracts, the Federal National Mortgage Association, CDC Guaranteed Investment Contracts, AIG Guaranteed Investment Contracts, and Royal Bank of Canada Guaranteed Investment Contracts. These investments are 12.97 percent, 9.78 percent, 8.52 percent, 6.77 percent, and 6.35 percent, respectively, of the Corporation's total investments.

Southern Utah University had \$5.209 million, 17.7 percent, of its investments in Federal Home Loan Notes.

C. Securities Lending

The Utah Retirement Systems (pension trust funds) and the Public Employees Health Program (component unit) participate in security lending programs as authorized by their Boards. The types of securities lent are U.S. government securities, equity securities, and corporate bonds and notes. Under these programs, securities are transferred to an independent broker or dealer in exchange for collateral in the form of cash, government securities, and irrevocable bank letters of credit equal to 102 percent of the market value of the domestic securities on loan and 105 percent of the market value of the international securities on loan, with a simultaneous agreement to return the collateral for the same securities in the future. There are no restrictions on the amount of loans that can be made. For both state entities, their custodial bank is the agent for its securities lending program. Securities under loan are maintained in both state entities' financial records. Corresponding liabilities for collateral received are recorded at the fair value.

At yearend, neither the Utah Retirement Systems nor Public Employees Health Program had any credit risk exposure to borrowers because the collateral exceeded the amount borrowed. The securities on loan at yearend for the entities were \$2.379 billion and \$23.688 million, respectively, and the collateral received for those securities on loan was \$2.455 billion and \$24.190 million (includes \$127 thousand of non-cash collaterals), respectively, with carrying amount and fair value being the same. Under the terms of the lending agreement, both state entities are indemnified against loss should the lending agent be unable to recover borrowed securities and distributions due to borrower insolvency or failure of the lending agent to properly evaluate the creditworthiness of the borrower. In addition, they are indemnified against loss should the lending agent fail to demand adequate and appropriate collateral on a timely basis. All securities loaned can be terminated on demand by either the state entity or the borrower. Cash collateral is invested in the lending agent's short-term investment pool. The short-term investment pool guidelines specify that a minimum of 20 percent of the invested cash collateral is to be available each business day and that the dollar weighted average maturity of holdings should not exceed 60 days. The relationship between the maturities of the

short-term investment pool and each of the state entities' loans is affected by the maturities of the securities loans made by other entities that use the agent's pool, which the state entities cannot determine. Since the securities lending collateral is in a pool maintained by the custodial bank, the state entities do not have the ability to pledge or sell the securities, and it is not necessary to report the total income and expenses of securities lending.

D. Derivative Financial Instruments

Utah Retirement Systems

The Utah Retirement Systems (URS) (pension trust funds) invests in derivative financial investments as authorized by Board policy. The derivatives are reported at their fair values on the statement of net assets. Derivatives are financial arrangements between two parties whose payments are based on, or "derived" from the performance of some agreed upon benchmark. At December 31, 2005, URS had four types of derivative financial investments: futures, currency forwards, options, and swaps.

Futures represent commitments to purchase (asset) or sell (liability) securities at a future date and at a specified price. Futures contracts are traded on organized exchanges (exchange traded), thereby minimizing URS's credit risk. The net change in the futures contract value is settled daily in cash with the exchanges. Net gains or losses resulting from the daily settlements are included with trading account securities gains (losses) in the Statement of Changes in Net Assets. At December 31, 2005, URS investments had the following futures balances (expressed in millions):

	Value Covered By Contract
Long-cash and cash equivalent futures	\$ 104,485
Long-equity futures	\$ 736,324
Short-equity futures	\$ (413,397)
Long-debt securities futures.....	\$ 767,163
Short-debt securities futures	\$ (135,174)

Currency forwards represent forward foreign exchange contracts that are entered into in order to hedge the exposure to changes in foreign currency exchange rates on the foreign currency dominated portfolio holdings. A forward foreign exchange contract is a commitment to purchase or sell a foreign currency at a future date at a negotiated forward rate. The gain or loss arising from the difference between the original contracts and the closing of such contracts is included in net realized gains or losses on foreign currency related transactions. At December 31, 2005, URS investments included the following currency forwards balances (expressed in billions):

Currency forwards (<i>pending foreign exchange purchases</i>)	\$ 1,482
Currency forwards (<i>pending foreign exchange sales</i>).....	\$ (1,478)

Options represent or give buyers the right, but not the obligation, to buy or sell an asset at a preset price over a specific period. The option's price is usually a small percentage of the underlying asset's value. As a writer of financial options, URS receives a premium at the outset of the agreement and bears the risk of an unfavorable change in the price of the financial instrument underlying the option. As a purchaser of financial options, URS pays a premium at the outset of the agreement and the counterparty bears the risk of an unfavorable change in the price of the financial instrument

underlying the option. At December 31, 2005, URS investments had the following options balances (expressed in thousands):

	Value Covered By Contract
Cash and cash equivalent purchased call options.....	\$ 2,869
Cash and cash equivalent purchased put options	\$ (13)
Fixed income written put options	\$ (110)
Fixed income written call options.....	\$ 753

Swaps represent an agreement between two or more parties to exchange sequences of cash flows over a period in the future. At the

end of the year, URS had two different types of swap arrangements: interest rate swaps and credit default swaps. In the most common type of interest rate swap arrangement, one party agrees to pay fixed interest payments on designated dates to a counter party who, in turn, agrees to make return interest payments that float with some reference rate. The interest rate swaps allowed URS to convert their long term variable interest rate credit facility loans into fixed interest rate loans. The credit default swaps protects the rental cash flows on one of URS real estate investments in case the major tenant defaults on its lease contract. Gains and losses on swaps are determined based on market values and are recorded in the Statement of Changes in Net Assets. At December 31, 2005, URS investments had the following swap market value balances:

Utah Housing Corporation

The following are disclosures for derivative financial instruments held by Utah Housing Corporation (major component unit).

Objective — In order to protect against the potential of rising interest rates, the Corporation has entered into 60 separate pay-fixed, receive-variable interest rate swaps and one Interest Rate Cap Agreement as of June 30, 2006. The cost of these swaps is less than what the Corporation would have paid to issue fixed rate debt. The Corporation's swaps are all similar in nature and summary information is included in this report. More detailed information

about each swap is included in the Corporation's separately issued financial statements.

Terms, Fair Values, and Credit Risk — The terms, including the fair values of the outstanding swaps as of June 30, 2006, are summarized below. The notional amounts of the swaps matched the principal amounts of the associated debt at the time of issuance. Except as discussed under rollover risk, the Corporation's swap agreements contain scheduled reductions to outstanding notional amounts that are expected to approximately follow scheduled or anticipated reductions in the associated bonds payable.

\$ 1,875	2005	1.02%	Excess of BMA ** over 5.73%	\$ (203)	2027

* London Interbank Offered Rate

** The Bond Market Association Municipal Swap Index

Fair Values — The fair values of swaps are a function of market interest rates and the remaining term on the swap contracts. The fair values of the swap contracts were estimated using the zero-coupon method. This method calculates the future net settlement payments required by the swap, assuming that the current forward rates implied by the yield curve correctly anticipate future spot interest rates. These payments are then discounted using the spot rates implied by the current yield curve for hypothetical zero-coupon bonds due on the date of each future net settlement on the swaps.

Credit Risk — The Corporation executes swap transactions with two counterparties, Lehman Brothers Financial Products, Inc. and Lehman Brothers Derivative Products, Inc. Both counterparties are rated AAA/Aaa, which mitigates any credit risk associated with the derivatives' fair value.

Basis Risk — The Corporation's tax-exempt variable-rate bond coupon payments are equivalent to the BMA rate. Its taxable variable-rate bond coupon payments are equivalent to the LIBOR rate. The Corporation is therefore not exposed to basis risk except as disclosed below under Tax Risk/Cross-over.

Tax Risk / Cross-over — Nineteen of the Corporation's BMA based swaps are exposed to basis risk should Congress or other federal branches of government propose or pass legislation (a "Tax Event"), that causes the relationship between LIBOR and BMA to exceed 75 percent for a continuous period of 180 days. If both of these events occur the result would be that the swap provider would pay the Corporation 68 percent of the LIBOR rate regardless of what the BMA rate is. In addition, various of the Corporation's BMA based Cross-over Swaps are also exposed to basis risk if the LIBOR rate is 3.5 percent or greater and in some cases 4 percent or greater. When the LIBOR rate is greater than 3.5 or 4 percent, the provider will pay the Corporation 68 percent of the LIBOR rate regardless of what the BMA rate is. As of June 30, 2006, no "Tax Event" or "Cross-over Event" has occurred.

Termination Risk — The Corporation or the counterparty may terminate any of the swaps if the other party fails to perform under the terms of the contract.

Rollover Risk — The Corporation is exposed to rollover risk on swaps that mature or may be terminated prior to the maturity of the associated debt. When these swaps terminate, or in the case of the termination option, the Corporation will not realize the synthetic rate offered by the swaps on the underlying debt issues. As of June 30, 2006, the Corporation's swap termination dates ranged from 7 to 26 years prior to the maturity dates of the associated debt.

NOTE 4. INVESTMENT POOL

The Utah State Treasurer's Office operates the Public Treasurer's Investment Fund (PTIF) investment pool. The PTIF is available for investment of funds administered by any Utah public treasurer. Participation is not required and no minimum balance or minimum/maximum transaction is required. State agencies and funds that are authorized to earn interest also invest in the PTIF as an internal investment pool. No separate report as an external investment pool has been issued for the PTIF.

The PTIF is not registered with the SEC as an investment company and is not rated. The PTIF is authorized and regulated by the Utah Money Management Act, (*Utah Code* Title 51, Chapter 7). The Act establishes the Money Management Council, which oversees the activities of the State Treasurer and the PTIF. The Act lists the investments that are authorized which are high-grade securities and, therefore, there is very little credit risk except in the most unusual and unforeseen circumstances. Deposits in the PTIF are not insured or otherwise guaranteed by the State of Utah, and participants share proportionally in any realized gains or losses on investments.

The PTIF operates and reports to participants on an amortized cost basis. The income, gains, and losses, net of administration fees, of the PTIF are allocated to participants on the ratio of the participant's share to the total funds in the PTIF based on the participant's average daily balance. The PTIF allocates income and issues statements on a monthly basis. Twice a year, at June 30 and December 31, which are the accounting periods for public entities, the investments are valued at fair value and participants are informed of the fair value valuation factor that enables them to adjust their statement balances to fair value.

The PTIF condensed financial statements, inclusive of external and internal participants along with the portfolio statistics for the fiscal

year ended June 30, 2006, are as follows:

Deposits and Investments

The following disclosure of deposits and investments is for the PTIF, which includes external and internal participants. These assets are also included in the Note 3 disclosures of deposits and investments for the primary government. To avoid duplication, some of the detailed information in Note 3 has not been repeated in this note.

The deposits in the bank in excess of the insured amount are uninsured and uncollateralized. Deposits are not collateralized nor are they required to be by state statute. The deposits for the PTIF at June 30, 2006, were \$79.044 million. Of those, \$78.344 million were exposed to custodial credit risk as uninsured and uncollateralized.

Custodial Credit Risk — Deposits

The custodial credit risk for deposits is the risk that in the event of a bank failure, the PTIF's deposits may not be recovered. The PTIF follows the Money Management Act by making deposits only in qualified financial institutions in accordance with the Act.

Investments

The PTIF follows the Money Management Act by investing only in securities authorized in the Act. See Note 3 for information on authorized investments.

The PTIF investments at June 30, 2006, are presented below.

Public Treasurer's Investment Fund Investments
(Expressed in Thousands)

Investment Type	Fair Value	Investment Maturities (in years)	
		Less Than 1	1–5
<u>Debt Securities</u>			
U.S. Agencies	\$ 2,411,782	\$ 2,246,683	\$ 165,099
Corporate Bonds and Notes	5,134,008	5,134,008	—
Negotiable Certificates of Deposit...	272,809	272,809	—
Money Market Mutual Fund.....	40,000	40,000	—
Commercial Paper	195,745	195,745	—
	<u>\$ 8,054,344</u>	<u>\$ 7,889,245</u>	<u>\$ 165,099</u>

The majority of the PTIF's U.S. agencies and corporate debt securities are variable-rate securities, most of which reset every three months to the market interest rate. Because these securities frequently reprice to prevailing market rates, interest rate risk is substantially reduced at each periodic reset date. In the table above, variable-rate securities are presented according to the length of time until the next reset date rather than the stated maturity.

U.S. agency debt securities of \$1.597 billion of the PTIF reset periodically and have a maximum maturity out to three years. The securities "step up" to higher interest rates at levels determined at the time of purchase. These securities are callable at par and may be called on a quarterly basis, or will mature at par if held to maturity. In the event that current market interest rates were to exceed the predetermined rates, the fair value of the securities would be impacted.

Interest Rate Risk — Investments

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. The PTIF's policy for managing interest rate risk is to comply with the State's Money Management Act. See Note 3 for information on requirements of the Act related to interest rate risk.

Credit Risk of Debt Securities

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. The PTIF follows the Money Management Act as its policy for reducing exposure to investment credit risk. The PTIF's rated debt investments as of June 30, 2006, were rated by Standard and Poor's and/or an equivalent nationally recognized statistical rating organization and the ratings are presented below using the Standard and Poor's rating scale.

Concentration of Credit Risk — Investments

Concentration of credit risk is the risk of loss attributed to the magnitude of a government's investment in a single issuer. The PTIF's policy for reducing this risk of loss is to comply with the Rules of the Money Management Council. Rule 17 of the Money Management Council limits investments in a single issuer of commercial paper and corporate obligations to 5 percent of the total

dollar amount held in the portfolio. The Money Management Council limitations do not apply to securities issued by the U.S. government and its agencies. The PTIF had debt securities investments at June 30, 2006, with more than 5 percent of the total investments in Federal Home Loan Bank and Federal Home Loan Mortgage Corporation. These investments represented 17.8 percent and 8.8 percent, respectively, of total investments.

Accounts receivable balances are an aggregation of amounts due from the federal government, customers, and others. Receivables from customers include charges for services to local governments, fees and fines issued by the courts and corrections, employer contributions for unemployment benefits, and receivables as a result of overpayments to individuals receiving state assistance.

Receivables for fiduciary funds listed above represent amounts due from fiduciary funds that were reclassified as external receivables on the government-wide Statement of Net Assets.

Aggregated receivables for component units at June 30, 2006, were \$1.395 billion for major component units and \$76.772 million for nonmajor component units, net of an allowance for doubtful accounts of \$48.928 million and \$4.844 million, respectively.

NOTE 6. ACCOUNTS PAYABLE AND ACCRUED LIABILITIES

Accounts payable and accrued liability balances are an aggregation of amounts due to: **(1)** state employees for salaries/benefits; **(2)** service providers for childcare, job services and health services; **(3)** vendors and miscellaneous suppliers; **(4)** local and federal governments for services; **(5)** individuals and others as a result of tax overpayments; and **(6)** interest due on bonds and other obligations.

Adjustments for fiduciary funds listed above represent amounts due to fiduciary funds that were reclassified as external payables on the government-wide Statement of Net Assets. Other adjustments are due to differences in the presentation and the basis of accounting between the fund financial statements and the government-wide Statement of Net Assets.

NOTE 7. INTERFUND BALANCES AND LOANS**Interfund Balances**

Interfund balances at June 30, 2006, consisted of the following (in thousands):

Due to General Fund from:

Uniform School Fund.....	\$ 121
Transportation Fund.....	843
Trust Lands Fund.....	27
Nonmajor Governmental Funds.....	2,288
Unemployment Compensation Fund.....	8,139
Nonmajor Enterprise Funds.....	11,158
Internal Service Funds.....	1,261
Fiduciary Funds.....	284

Total due to General Fund from other funds \$ 24,121

Due to Uniform School Fund from:

General Fund.....	420
Trust Lands Fund.....	25
Unemployment Compensation Fund.....	169
Nonmajor Enterprise Funds.....	3,371
Internal Service Funds.....	37

Total due to Uniform School Fund from other funds \$ 4,022

Due to Transportation Fund from:

General Fund.....	199
Nonmajor Governmental Funds.....	1
Nonmajor Enterprise Funds.....	4
Internal Service Funds.....	34

Total due to Transportation Fund from other funds \$ 238

Due to Trust Lands Fund from

Nonmajor Enterprise Funds.....	\$ 6,392
--------------------------------	----------

Due to Nonmajor Governmental Funds from:

General Fund.....	1,637
Nonmajor Governmental Funds.....	24
Nonmajor Enterprise Funds.....	9
Internal Service Funds.....	139
Fiduciary Funds.....	24

Total due to Nonmajor Governmental Funds from other funds \$ 1,833

Due to Water Loan Programs from:

General Fund.....	117
Trust Lands Fund.....	43
Nonmajor Enterprise Funds.....	18

Total due to Water Loan Programs from other funds \$ 178

Due to Nonmajor Enterprise Funds from:

General Fund.....	\$ 502
Transportation Fund.....	92
Nonmajor Governmental Funds.....	14,885
Internal Service Funds.....	5

Total due to Nonmajor Enterprise Funds from other funds \$ 15,484

Due to Internal Service Funds from:

General Fund.....	7,988
Uniform School Fund.....	249
Transportation Fund.....	3,003
Nonmajor Governmental Funds.....	591
Nonmajor Enterprise Funds.....	130
Internal Service Funds.....	127
Fiduciary Funds.....	386

Total due to Internal Service Funds from other funds \$ 12,474

Due to Fiduciary Funds from:

General Fund.....	2,731
Uniform School Fund.....	1
Transportation Fund.....	12
Nonmajor Enterprise Funds.....	51
Internal Service Funds.....	82

Total due to Fiduciary Funds from other funds \$ 2,877

Total Due to/Due froms \$ 67,619

These balances resulted from the time lags between the dates that: (1) interfund goods and services are provided or reimbursable expenditures occur; (2) transactions are recorded in the accounting system; and (3) payments between funds are made.

Interfund Loans

Interfund loans at June 30, 2006, consisted of the following (in thousands):

Payable to General Fund from Internal Service Funds \$ 27,507

Payable to General Fund from Nonmajor Enterprise Funds 604

Payable to Nonmajor Enterprise Funds from Internal Service Funds 20

Total Interfund Loans Receivable/Payable \$ 28,131

The interfund loans receivable/payable balances consist of revolving loans with Internal Service Funds. The balance payable to the General Fund from Internal Service Funds of \$27.507 million includes \$10.74 million that is not expected to be repaid within one year.

Construction-in-progress of governmental activities includes amounts for buildings the State is constructing for colleges and universities (component units) that are funded by state appropriations or state bond proceeds. As the buildings are completed, the applicable amounts are deleted from construction-in-progress of governmental activities and “transferred” to the colleges and universities. For fiscal year 2006, \$91.471 million of buildings were completed for colleges and universities. On the government-wide statement of activities, the building “transfers” are reported as higher education expenses of governmental activities and as program revenues of component units.

Depreciation expense of governmental activities was charged to functions as follows (in thousands):

General Government	\$ 9,780
Human Services and Youth Corrections	4,945
Corrections, Adult	5,248
Public Safety	4,194
Courts	5,244
Health and Environmental Quality	2,542
Employment and Family Services	1,989
Natural Resources	6,953
Community and Culture	477
Business, Labor, and Agriculture	1,131
Public Education	528
Transportation	8,586
Depreciation on capital assets of the State's internal service funds is charged to the various functions based on their usage of services provided	17,129
Total	<u>\$ 68,746</u>

Discretely Presented Component Units

NOTE 9. LEASE COMMITMENTS

The State leases office buildings and office and computer equipment. Although the lease terms vary, most leases are subject to annual appropriations from the State Legislature to continue the lease obligations. If an appropriation is reasonably assured, leases are considered noncancellable for financial reporting purposes.

Leases, that in substance are purchases, are reported as capital lease obligations. In the government-wide financial statements and proprietary fund financial statements, assets and liabilities resulting from capital leases are recorded at the inception of the lease at either the lower of fair value or the present value of the future minimum lease payments. The principal portion of lease payments reduces the liability, and the interest portion is expensed.

On the governmental fund financial statements, both the principal and interest portions of capital lease payments are recorded as expenditures of the applicable governmental function.

The primary government's capital lease payments were \$1.287 million in principal and \$1.231 million in interest for fiscal year 2006. As of June 30, 2006, the historical cost of the primary government's assets

acquired through capital leases was \$26.257 million of which \$24.719 million was buildings and \$1.538 million was equipment and other depreciable assets. As of June 30, 2006, the accumulated depreciation of the primary government's assets acquired through capital leases was \$8.641 million of which \$8.112 million was buildings and \$529 thousand was equipment and other depreciable assets.

Operating leases contain various renewal options, as well as some purchase options. However, due to the nature of the leases, they do not qualify as capital leases and the related assets and liabilities are not recorded. Any escalation clauses, sublease rentals, and contingent rents were considered immaterial to the future minimum lease payments and current rental expenditures. Operating lease payments are recorded as expenditures or expenses when paid or incurred.

Operating lease expenditures for fiscal year 2006 were \$26.206 million for the primary government and \$30.931 million for component units. For fiscal year 2005, the operating lease expenditures were \$25.321 million for the primary government and \$18.635 million for component units. Future minimum lease commitments for noncancellable operating leases and capital leases as of June 30, 2006, were as follows:

Future Minimum Lease Commitments
(Expressed in Thousands)

Compensated absences of governmental activities are liquidated in the General Fund, Uniform School Fund, or Transportation Fund according to the applicable employing state agency. Claims liabilities of governmental activities are liquidated in the Risk Management Internal Service Fund.

B. General Obligation Bonds

The State issues general obligation bonds to provide funds for acquisition, construction, and renovation of major capital facilities and for highway construction. In addition, general obligation bonds have been issued to refund general obligation bonds, revenue bonds, and capitalized leases. General obligation bonds are secured by the full faith and credit of the State. Debt

service requirements are provided by legislative appropriation from the State's general tax revenues. As of June 30, 2006, the State had \$130.942 million and \$32.398 million of authorized but unissued general obligation building and highway bond authorizations remaining, respectively.

General obligation bonds payable consist of the following:

General Obligation Bonds Payable
(Expressed in Thousands)

Bond Issue	Date Issued	Maturity Date	Interest Rate	Original Issue	Balance June 30, 2006

C. Revenue Bonds

Revenue bonds payable consist of those issued by the Utah State Building Ownership Authority, the Utah State Board of Regents Student Loan Purchase Program, the Utah Housing Corporation, and the various colleges and universities. These bonds are not considered general obligations of the State.

Governmental Activities

The Utah State Building Ownership Authority (SBOA) has issued bonds for the purchase and construction of facilities to be leased to state agencies and other organizations. The bonds are secured by the facilities and repayment is made from lease income. The outstanding bonds payable at June 30, 2006, are reported as a long-term liability of the governmental activities, except for \$37.302 million and \$1.04 million which are reported in the Alcoholic Beverage Control Fund, and the Utah Correctional Industries Fund (nonmajor enterprise funds), respectively. These portions are reported as liabilities of the business-type activities on the government-wide statement of net assets.

During fiscal year 2006, the average interest rate for the SBOA Series 2001 C variable rate demand lease revenue bonds was 3 percent, there is no stated minimum rate, but the maximum rate is 12 percent. The rate on the bond is reset weekly by the remarketing agent and fluctuates with the general changes in interest rates and the demand for these particular securities. In the applicable debt service requirements to maturity schedule, the interest rate used to project debt service requirements was 3.98 percent, which was the rate in effect at yearend.

Revenue bonds payable consist of the following:

Revenue Bonds Payable – Component Units
(Expressed in Thousands)

Bond Issue	Date Issued	Maturity Date	Interest Rate	Original Issue	Balance June 30, 2006
Utah Housing Corporation Issues	1985–2006	2006–2050	Variable and 1.50% to 10.30%	\$ 2,616,328	\$ 1,478,105
Colleges and Universities Revenue Bonds	1987–2006	2006–2035	Variable and 1.90% to 6.75%	\$ 605,635	389,441
Total Revenue Bonds Outstanding					1,867,546
Colleges and Universities Less Unamortized Bond Discount					(110)
Total Revenue Bonds Payable					<u>\$ 1,867,436</u>

Business-type Activities

The Utah State Board of Regents Student Loan Purchase Program bonds were issued to provide funds for student loans and are secured by all assets of the Board of Regents Revenue Bond Funds and by the revenues and receipts derived from such assets. The Board of Regents has also issued a revenue bond for an office facility secured by funds within the Board of Regents budget that would otherwise be expended for rent.

The Student Assistance Programs have \$391.635 million of bonds bearing interest at an adjustable rate, which is determined weekly by a remarketing agent. The Programs also have adjustable rate bonds that are set by an auction procedure every 28 days in the amount of \$847.1 million and \$859.725 million of bonds that are auctioned every 35 days.

Discrete Component Units

The Utah Housing Corporation bonds were issued to provide sources of capital for making housing loans to persons of low or moderate income. The bonds are secured by mortgages, and repayments are made from the mortgage payments.

The colleges and universities issue bonds for various purposes, including student housing, special events centers, and student union centers. The bonds are secured by the related assets, student building fees, and other income of certain college activities.

D. Conduit Debt Obligations

Of the Utah Housing Corporation (component unit) bonds outstanding, \$304.186 million were issued as multi-family purchase bonds. Of those bonds, \$298.286 million are conduit debt obligations issued on behalf of third parties. The Corporation is not obligated in any manner for repayment of the conduit debt. However, in accordance with the Corporation's accounting policies, the conduit debt is reported in the Corporation's financial statements.

In 1985, the State Board of Regents authorized the University of Utah (component unit) to issue Variable Rate Demand Industrial Development Bonds for the Salt Lake City Marriott University Park Hotel separate from the University. The bonds are payable solely from revenues of the hotel. The bonds do not constitute a debt or pledge of the faith and credit of the University of Utah or the State and, accordingly, have not been reported in the accompanying financial statements. The outstanding balance of the bonds at June 30, 2006, is \$6.425 million.

E. Demand Bonds

- The Utah State Building Ownership Authority (SBOA) issued \$30.3 million Series 2001 C variable rate demand lease revenue bonds. The bonds are subject to purchase upon not less than seven days notice of tender from the bondholder or in case the bonds cannot be remarketed. The remarketing agent is paid a fee of 5 basis points of the bonds outstanding on a quarterly basis.

In the case that the bonds cannot be remarketed, the SBOA has an irrevocable direct-pay letter of credit with Landesbank Hessen-Thüringen Girozentrale (Helaba) acting through its New York Branch in the amount of \$30.828 million, which is an amount sufficient to pay principal and 53 days of accrued interest at 12 percent. In consideration for the letter of credit, Helaba receives a fee of 18.5 basis points paid on a quarterly basis. The letter of credit expires on December 31, 2015, and as of June 30, 2006, the SBOA has not had to draw any funds for bondholder tenders or a failed remarketing.

The letter of credit also has a take out agreement for the bonds that allows the SBOA to pay the bonds that Helaba holds (bank bonds) over a five-year period in approximately equal payments. The rate in effect for bank bonds for the first 90 days is the base rate, which is the higher of the Federal Funds rate plus 50 basis points or the Prime Rate, up to a maximum of 12 percent per annum. The interest rate for bank bonds held longer than 90 days is the base rate plus 2 percent. If the take out agreement were in effect and assuming all the bonds were not remarketed, the SBOA would pay debt service of \$8.406 million a year for five years, based on the maximum rate.

- The Student Loan Purchase Program had \$391.635 million of demand bonds outstanding at June 30, 2006, subject to purchase on the demand of the holder at a price equal to principal plus accrued interest, on seven days notice and delivery to the Board's remarketing agent.

In the event bonds cannot be remarketed, the Board has standby bond purchase agreements and a letter of credit

agreement sufficient to pay the purchase price of bonds delivered to it. The Board pays quarterly fees to maintain the standby bond purchase agreements and letter of credit on the demand bonds.

An unused irrevocable direct-pay letter of credit expiring November 15, 2011, in the amount of \$37.462 million supports the Series 1993 A bonds of \$35 million. Standby bond purchase agreements of \$25.336 million expiring November 20, 2013 to support the Series 1988 C bonds of \$25 million, \$85.294 million expiring November 16, 2025, support the Series 1996 Q and 1997 R bonds of \$101.055 million and \$158.753 million expiring February 11, 2024 to support the 2005 Series W and X bonds of \$151.08 million. As of June 30, 2006, the Board had not drawn any funds under the standby bond purchase agreements or the letter of credit.

- The Utah Housing Corporation (component unit) had \$695.2 million of bonds outstanding at June 30, 2006, subject to purchase on the demand of the holder at a price equal to principal plus accrued interest, on delivery to the remarketing agent.

In the event the variable rate bonds cannot be remarketed, the Corporation has entered into various irrevocable Standby Bond Purchase Agreements (Liquidity Facility) with five different banks totaling \$900 million. These Agreements provide that these institutions will provide funds to purchase the variable rate bonds that have been tendered and not remarketed. These liquidity providers receive a fee ranging from 12.5 to 17.5 basis points of the outstanding amount of the variable rate bonds paid on a quarterly basis. The Corporation has not drawn on any of the facilities to date.

- The University of Utah (component unit) Series 1997 A bonds in the amount of \$13 million currently bear interest at a weekly rate in accordance with bond provisions. When a weekly rate is in effect, the Series 1997 A bonds are subject to purchase on the demand of the holder at a price equal to principal plus accrued interest on seven days notice and delivery to the University's tender agent. The interest requirement for the Series 1997 A Bonds is calculated using an interest rate of 4.01 percent, which is the rate in effect as of June 30, 2006.

In the event the bonds cannot be remarketed, the tender agent is required to draw on an irrevocable standby bond purchase agreement to pay the purchase price of the bonds delivered to it. The standby bond purchase agreement is with J.P. Morgan Chase Bank and is valid through July 30, 2010. As of June 30, 2006, the University had not drawn any funds under the standby bond purchase agreement.

F. Defeased Bonds and Bond Refunding

In prior years, the State defeased certain general obligation and revenue bonds by placing the proceeds of new bonds and other monies available for debt service in irrevocable trusts to provide for all future debt service payments on the old bonds. Accordingly, the trust account assets and the liability for the defeased bonds are not included in the Statement of Net Assets. At June 30, 2006, the total amount outstanding of defeased general obligation bonds was \$571.06 million. At June 30, 2006, the total amount outstanding of defeased revenue bonds was \$55.87 million.

In prior years, component units defeased certain revenue bonds by placing the proceeds of new bonds and various bond reserves in irrevocable trusts to provide for all future debt service payments on the old bonds. Accordingly, the trust account assets and the liability for the defeased bonds are not included in the component unit column on the Statement of Net Assets. At June 30, 2006, \$145.509 million of college and university bonds outstanding are considered defeased.

G. Contracts Payable

Component unit capital leases/contracts payable include \$5.294 million in life annuity contracts.

H. Notes Payable

The notes payable balance consists of notes issued by component units for the purchase of buildings and equipment. The notes bear various interest rates and will be repaid over the next 25 years. They are secured by the related assets.

I. Debt Service Requirements for Derivatives

Swap Payments and Associated Debt — As explained in Note 3.D., Utah Housing Corporation (major component unit) had entered into 60 separate pay-fixed, receive-variable interest rate swaps and an interest rate cap agreement as of June 30, 2006. Using rates as of June 30, 2006, debt service requirements of the

Corporation's outstanding variable-rate debt and net swap payments are summarized below (in thousands). As rates vary, variable-rate bond interest payments and net swap payments will vary. The principal, interest and net swap interest are included in the Component Unit debt service schedule presented on page 91 for Utah Housing Corporation.

NOTE 11. GOVERNMENTAL FUND BALANCES AND NET ASSETS RESTRICTED BY ENABLING LEGISLATION**A. Governmental Fund Balances – Reserved and Designated**

The State's reserved fund balances represent: (1) **Nonlapsing Appropriations** which include continuing appropriations or

nonlapsing funds, encumbrances for construction contracts in the capital projects funds, and limited encumbrances in the general and special revenue funds; or (2) **Restricted Purposes** which include fund balances that are legally restricted for other purposes, assets restricted by bond agreements or other external restrictions, and those portions of fund balance that are not available for appropriation or expenditure, such as loans to internal service funds. A summary of the nature and purpose of these reserves by fund type at June 30, 2006, follows:

Reserved Fund Balances (Expressed in Thousands)			
	Nonlapsing Appropriations	Restricted Purposes	Total Reserved

B. Net Assets Restricted by Enabling Legislation

The State's net assets restricted by enabling legislation represent resources which a party external to a government—such as citizens, public interest groups, or the judiciary—can compel the government to use only for the purpose specified by the legislation.

The government-wide Statement of Net Assets reports \$3.519 billion of restricted net assets, of which \$17.743 million is restricted by enabling legislation.

NOTE 12. DEFICIT NET ASSETS AND FUND BALANCE

Funds reporting a deficit total net assets position at June 30, 2006, are (in thousands):

Private Purpose Trust Funds:

Employers' Reinsurance	\$ (162,331)
Petroleum Storage Tank.....	\$ (48,515)

The deficit in the Employers' Reinsurance Trust represents the unfunded portion of the actuarial estimate of claims incurred. The Employers' Reinsurance Trust claims are funded from assessments on workers' compensation insurance. The Utah Labor Commission sets the rate up to the maximum established by the Legislature to keep current revenues at a level sufficient to cover current cash disbursements. State law limits the State's liability to the cash or assets in the Employers' Reinsurance Trust

only. State law also limits the Trust's liability to claims resulting from industrial accidents or occupational diseases occurring on or before June 30, 1994. For claims resulting from accidents or diseases on or after July 1, 1994, the employer or its insurance carrier is liable for resulting liabilities.

The Petroleum Storage Tank Trust covers the clean-up costs of leaks from state-approved underground petroleum storage tanks. The assets in the fund are more than adequate to pay current claims. Unfunded future claims will be funded by future revenues.

Funds/activities reporting a deficit position in the unrestricted portion of their net assets at June 30, 2006, are (in thousands):

Internal Service Funds:

General Services.....	\$ (578)
Fleet Operations	\$ (17,327)

The Internal Service Funds deficits are mainly due to the significant investment in capital assets required for these operations. The deficits will be covered by future charges for services. Management may also seek rate increases to help reduce these deficits.

In addition, the Capital Projects – General Government Fund (nonmajor governmental fund) reported a \$93.348 million deficit unreserved undesignated fund balance as a result of outstanding encumbrances on various capital projects. Appropriations and bond proceeds available in the next fiscal year will fund this deficit.

NOTE 13. INTERFUND TRANSFERS

Transfers between funds occur when one fund collects revenue and transfers the assets to another fund for expenditure or when one fund provides working capital to another fund. All transfers must be legally authorized by the Legislature through statute or an *Appropriation Act*. Interfund transfers for the fiscal year ended June 30, 2006, are as follows (in thousands):

	Transfers In:					
	Governmental Funds					
	General Fund	Uniform School Fund	Transportation Fund	Transportation Investment Fund	Trust Lands Fund	Nonmajor Governmental Funds
Transfers Out:

Total Transfers In	\$ 1,582	\$ 72,807	\$ 641	\$ 1,010,753

Transfers from major governmental funds to nonmajor governmental funds are primarily for capital facility construction and debt service expenditures. Transfers from the General Fund to nonmajor enterprise funds are primarily mineral lease royalties used to make loans and grants to local governments through the Community Impact Loan Fund. Transfers from nonmajor enterprise funds to the General Fund are mostly liquor profits from the Alcoholic Beverage Control Fund that are required by statute to be deposited in the General Fund. All other transfers are made to finance various programs as authorized by the Legislature.

During fiscal year 2006, the legislature authorized transfers of \$66 thousand from the Internal Service Funds to the General Fund to subsidize general fund revenues. In addition, the Legislature authorized payments of \$682.886 million to the Colleges and Universities. Payments to Colleges and Universities are reported as expenditures in both the General Fund fund statements and the Governmental Activities column of the Statement of Activities. They are also reported as revenues in the Component Units column of the Statement of Activities.

NOTE 14. LITIGATION, CONTINGENCIES, AND COMMITMENTS**A. Litigation**

The State is involved in various legal actions arising in the ordinary course of business. The State is vigorously contesting all of these matters, but as of this date it is not possible to determine the outcome of these proceedings. In the opinion of the Attorney General and management, the ultimate disposition of these matters will not have a material adverse effect on the State's financial position.

- Members of the Navajo Nation allege the State of Utah has mismanaged Navajo Nation Trust Fund monies. The plaintiffs are seeking an accounting of the legitimacy of the fund's receipts and disbursements, and damages of \$142 million including interest and attorneys' fees.
- A lawsuit was filed by the Tobacco Companies against the 45 states participating in a master settlement agreement in an effort to recoup tobacco settlement payments made in 2003. The plaintiffs allege that they are entitled to a non-participating manufacturer adjustment that will allow them to take a credit against the 2003 payment obligations. It is impossible to determine the potential liability; however, any settlement will be a reduction in future State tobacco receipts.
- In addition to the items above, the State is contesting other legal actions totaling over \$16 million plus attorneys' fees and interest and other cases where the amount of potential loss is undeterminable.

B. Contingencies

- Financial and compliance audits (Single Audit) of federal grants, contracts, and agreements were conducted under the provisions of the Federal Office of Management and Budget's circulars. As a result of the audits, the allowability of \$10.1 million of federal expenditures is in question. These costs will be contested with the federal agency involved, and management estimates the liability to be less than the questioned amounts. Other audit findings on noncompliance cannot be estimated as to the potential liability. The Single Audit for the fiscal year ended June 30, 2006, is in process and management expects proposed disallowances to be immaterial.
- Management's estimated liability for the Petroleum Storage Tank Trust (private purpose trust fund) is highly sensitive to change based on the short period of historical data and the uncertainties in estimating costs. Since it is not possible to determine the occurrence date of a leak in an underground storage tank, it is not possible to estimate the number or the associated costs of leaks that have not been detected.
- The Utah Department of Transportation (UDOT) plans on seeking reimbursement from the Federal Highway Administration (FHWA) for approximately \$18 million per year for fiscal years 2007 and 2008. The State received \$3.445 million in fiscal year 2006. The related costs were incurred by the State as a result of the I-15 reconstruction project and were originally paid using state funds. UDOT has not recorded an accounts receivable for these future reimbursement requests because the requests are contingent upon sufficient future federal funds and

federal obligation authority becoming available and future approval by the FHWA.

- The State is totally self-insured against liability claims and up to \$2.5 million in property claims incurred prior to July 1, 2006. For property claims incurred July 1, 2006 and after, the State is totally self-insured up to \$3.5 million. According to an actuarial study and other known factors, \$46.725 million exists as either incurred but unfiled or unpaid claims. This amount is reported as a liability of the Administrative Services Risk Management Fund (internal service fund).
- The Utah School Bond Guaranty Act (*Utah Code Annotated, 1953*, as amended, Sections 53A–28–101 to 402), which took effect on January 1, 1997, pledges the full faith, credit, and unlimited taxing power of the State to guaranty full and timely payment of the principal and interest on general obligation bonds issued by qualifying local school boards. The primary purpose of the Guaranty Act is to reduce borrowing costs for local school boards by providing credit enhancement for Guaranteed Bonds.

In the event a school board is unable to make the scheduled debt service payments on its Guaranteed Bonds, the State is required to make such payments in a timely manner. For this purpose, the State may use any available monies, may use short-term borrowing from the State Permanent School Fund (part of the permanent Trust Lands Fund), or may issue short-term general obligation notes. The local school board remains liable to the State for any such payments on Guaranteed Bonds. Reimbursements to the State may be obtained by intercepting payment of state funds intended for the local school board. The State may also compel the local school board to levy a tax sufficient to reimburse the State for any guaranty payments.

The State Superintendent of Public Instruction is charged with monitoring the financial condition of local school boards and reporting, at least annually, its conclusions to the Governor, the Legislature, and the State Treasurer. The State Superintendent must report immediately any circumstances which suggest a local school board may not be able to pay its debt service obligations when due. The State does not expect that it will be required to advance monies for the payment of debt service on Guaranteed Bonds for any significant period of time.

Local school boards have \$1.687 billion principal amount of Guaranteed Bonds outstanding at June 30, 2006. The State cannot predict the amount of bonds that may be guaranteed in future years, but no limitation is currently imposed by the Guaranty Act.

- The Attorney General of the State sued the tobacco industry for medical costs related to smoking. The State of Utah has signed on to a master settlement agreement along with 45 other states. The major tobacco manufacturers and most of the smaller manufacturers have joined the agreement. The State received \$26.029 million from tobacco companies in fiscal year 2006 and expects to receive approximately \$29.837 million in fiscal year 2007. Annual payments will be adjusted for factors such as inflation, decreased sales volume, previously settled law suits, disputed payments, and legal fees.

C. Commitments

- At June 30, 2006, the Industrial Assistance Program of the General

Fund had grant commitments of \$1.409 million, contingent on participating companies meeting certain performance criteria.

- Utah Retirement Systems (pension trust funds) has at its yearend December 31, 2005, committed to fund certain private equity partnerships and real estate projects for an amount of \$3.144 billion. Funding of \$1.948 billion has been provided, leaving an unfunded commitment of \$1.196 billion as of December 31, 2005, which will be funded over the next five years.
- As of June 30, 2006, the Utah Housing Corporation (major component unit) has committed to purchase mortgages under the warehouse loans and the Single-Family Mortgage Purchase Program in the amount of \$39.4 million. The Corporation has a Revolving Credit Loan with a community development company in the amount of \$2.5 million due August 3, 2007. At June 30, 2006, the outstanding balance was \$412.5 thousand and bears interest at the LIBOR Rate plus 2.5 percent.
- At June 30, 2006, the enterprise funds had loan commitments of approximately \$251.182 million and grant commitments of approximately \$23.607 million.
- At June 30, 2006, the Utah Higher Education Assistance Authority Student Loan Guarantee Program (Student Assistance Programs, major enterprise fund) had guaranteed student loans outstanding with an original principal amount of approximately \$2.325 billion. Also, at June 30, 2006, the Student Assistance Programs had commitments to purchase approximately \$341.677 million in student loans and provide approximately \$10.212 million in reductions to borrower loan balances.
- At June 30, 2006, the Department of Transportation had construction and other contract commitments of \$516.569 million, of which \$321.641 million is for Transportation Investment Fund (special revenue fund) projects and \$194.928 million is for Transportation Fund (special revenue fund) projects. These commitments will be funded with bonded debt and future appropriations.

NOTE 15. JOINT VENTURE

The Utah Communications Agency Network (UCAN) was created by the State Legislature in 1997 as an independent agency. Its purpose is to provide public safety communications services and facilities on a regional or statewide basis.

UCAN's governing board consists of ten representatives elected by the board, and five state representatives of which four are appointed by the Governor. The State has contracted to purchase communication services from UCAN to meet the needs of law enforcement officers in the Departments of Public Safety, Corrections, Natural Resources, and other smaller state agencies.

In fiscal year 1998 the State provided startup capital of \$185 thousand. UCAN receives federal funds as a subrecipient of grants awarded to the Department of Public Safety. UCAN also may receive legal counsel from the Attorney General's Office at no cost. Contracts with state agencies are estimated to provide over 30 percent of UCAN's operating revenues.

UCAN had \$9.8 million of revenue bonds outstanding at June 30, 2006. UCAN's debt is not a legal obligation of the State; however, if UCAN cannot meet its debt service requirements, state law allows the Governor to request an appropriation to restore the debt service reserve fund to its required level or to meet any principal or interest payment deficiency. The Legislature is not required to make any such appropriation, but if made, UCAN must repay the State within 18 months. To date, UCAN has never requested any such funding from the State and has had sufficient resources to cover its debt service and debt service reserve requirements.

The Utah State Auditor's Office audits UCAN's financial statements. Copies of those statements can be obtained from UCAN's administrative office or from the Utah State Auditor's Office.

NOTE 16. PENSION PLANS

Eligible employees of the State are covered by one of the following retirement plans:

A. Utah Retirement Systems

Utah Retirement Systems (URS) was established by Section 49 of *Utah Code Annotated, 1953*, as amended. URS administers the pension systems and plans under the direction of the URS Board, which consists of the State Treasurer and six members appointed by the Governor. URS has a separate accounting system and prepares a separately issued financial report covering all retirement systems and deferred compensation plans it administers. URS maintains records and prepares separately issued financial statements using fund accounting principles and the accrual basis of accounting under which expenses, including benefits and refunds, are recorded when the liability is incurred. Revenues, including contributions, are recorded in the accounting period in which they are earned and become measurable. URS reports on a calendar yearend. The December 31, 2005, financial report has been included in this Comprehensive Annual Financial Report as a pension trust fund for the Public Employees Retirement System (PERS) within the fiduciary funds. Copies of the separately issued financial report that include financial statements and required supplemental information may be obtained by writing to Utah Retirement Systems, 560 East 200 South, Salt Lake City, Utah 84102, or by calling 1-800-365-8772.

The URS operations are comprised of the following groups of systems and plans covering substantially all employees of the State, public education, and other political subdivisions of the State:

- The Public Employees Contributory Retirement System (Contributory System); the Public Employees Noncontributory Retirement System (Noncontributory System); and the Fire-fighters Retirement System, which are defined-benefit multiple-employer, cost-sharing, public employee retirement systems;
- The Public Safety Retirement System, which is a defined-benefit mixed agent and cost-sharing, multiple-employer retirement system;
- The Judges Retirement System and the Utah Governors and Legislative Pension Plan, which are single-employer service employee retirement systems; and four defined contribution plans comprised of the 401(k) Plan, 457 Plan, Roth and Traditional IRA Plans.

Retirement benefits are specified by Section 49 of *Utah Code Annotated, 1953*, as amended. The retirement systems are defined-benefit plans in which the benefits are based on age and/or years of service and highest average salary. Various plan options within the systems may be selected by retiring members. Some of the options

require actuarial reductions based on attained age, age of spouse, and similar actuarial factors. A brief summary of eligibility for and benefits of the systems is provided in the following table:

Summary of Eligibility and Benefits

	Contributory System	Noncontributory System	Public Safety System	Firefighters System	Judges System
Highest Average Salary	Highest 5 Years	Highest 3 Years		Highest 3 Years	Highest 2 Years
Years of Service	30 years any age	30 years any age		20 years any age	25 years any age
Required and/or Age	*20 years age 60	*25 years any age		10 years age 60	*20 years age 55
Eligible for Benefit	*10 years age 62 4 years age 65	*20 years age 60 *10 years age 62 4 years age 65		4 years age 65	10 years age 62 6 years age 70
Benefit Percent per Year of Service	1.25% to June 1975 2.00% July 1975 to present	2.00% per year	2.50% per year up to 20 years 2.00% per year over 20 years Benefit cannot exceed 70% of final average salary		5.00% first 10 years 2.25% second 10 years 1.00% over 20 years Benefit cannot exceed 75% of final average salary

*With actuarial reductions

Former governors at age 65 receive \$1,140 per month per term. Legislators receive a benefit actuarially reduced at age 62 with ten or more years of service, or an unreduced benefit at age 65 with four or more years of service at the rate of \$25.20 per month per year of service. Both the governors' and legislators' benefits are adjusted based on the Consumer Price Index (CPI), limited to 4 percent of the base benefit per year.

Death benefits for active and retired employees are in accordance with retirement statutes. Upon termination of employment, members of the systems may leave their retirement account intact for future

benefits based on vesting qualification, or withdraw the accumulated funds in their individual member account and forfeit service credits and rights to future benefits upon which the contributions were based.

As a condition of participation in the systems, employers and/or employees are required to contribute certain percentages of salaries and wages as authorized by statute and specified by the Board. Employee contributions may be paid in part or in whole by the employer. Contributions in some systems are also augmented by fees or insurance premium taxes. Below is a summary of system participants.

Participants December 31, 2005

	Non-contributory System	Contributory System	Public Safety System	Fire-fighters System	Judges System	Governors and Legislative Pension Plan
Number of participating:						
Employers.....	401	161	120	48	1	1
Members:						
Active.....	85,637	3,198	7,239	1,636	108	88
Terminated vested	26,028	1,437	1,376	94	6	96
Retirees and beneficiaries:						
Service benefits.....	25,710	6,171	3,252	909	88	230
Disability benefits	—	4	16	65	—	—

Employer contribution rates consist of (1) an amount for normal cost (the estimated amount necessary to finance benefits earned by the members during the current year) and (2) an amount for amortization of the unfunded, or excess funded actuarial accrued

liability over an open 20 year amortization period. These rates are determined using the entry age actuarial cost method with a supplemental present value and the same actuarial assumptions used to calculate the actuarial accrued liability.

The following table presents the State of Utah's actuarially determined employer contributions required and paid to URS. These amounts are equal to the annual pension costs for each of the stated years and all of these amounts were paid for each year. Accordingly,

the net pension obligation (NPO) at the end of each year was zero. For the Governors and Legislative Pension Plan, there has been no annual pension cost, required contributions, or NPO because the plan was overfunded for each of these years.

Deferred Compensation Plans

The 401(k), 457, Roth, and Traditional IRA Plans administered by URS, in which the State participates, are deferred compensation plans. These plans are available as supplemental plans to the basic retirement benefits of the retirement systems. Voluntary contributions may be made into the plans subject to plan and Internal Revenue Code limitations. Employer contributions may be made into the plans at rates determined by the employers. There are 351 employers participating in the 401(k) Plan and 154 employers participating in the 457 Plan. There are 127,279 plan participants in the 401(k) Plan, 13,825 participants in the 457 Plan, 259 participants in the Roth IRA Plan, and 118 participants in the Traditional IRA Plan.

After termination of employment, benefits are paid out to individuals in lump sum, or as periodic benefit payments, at the option of the participant based on individual account balances and plan provisions. The defined contribution plans account balances are fully vested to the participants at the time of deposit. Investments of the plans are reported at fair value.

Employees of the State are eligible to participate in the deferred compensation 401(k) Plan. The State and participating employers are required to contribute to employees who participate in the noncontributory retirement plan. The State contributes 1.5 percent of eligible employees' salaries which amount vests immediately. The amounts contributed to the 401(k) Plan during the year ended June 30, 2006, by employees and employers are as follows: for Primary Government, \$35.55 million and \$12.368 million; for Component

Units – Colleges and Universities, \$4.134 million and \$4.21 million; for Component Units – Other, \$857 thousand and \$570 thousand; and the combined total for all is \$40.541 million and \$17.148 million, respectively.

Pension Receivables and Investments

Investments are presented at fair value. The fair value of investments is based on published market prices and quotations from major investment brokers at current exchange rates, as available. Many factors are considered in arriving at that value. Corporate debt securities are valued based on yields currently available on comparable securities of issuers with similar credit ratings. Mortgages have been valued on an amortized cost basis, which approximates market or fair value. The fair value of real estate investments has been estimated based on independent appraisals. For investments where no readily ascertainable market value exists, management, in consultation with their investment advisors, have determined the fair value for the individual investments. Approximately 12 percent of the net assets held in trust for the pension benefits are invested in debt securities of the U.S. Government and its instrumentalities. Of the 12 percent, approximately 3 percent are U.S. Government debt securities and 9 percent are debt securities of the U.S. Government instrumentalities. The systems and plans have no investments of any commercial or industrial organization whose market value equals 5 percent or more of the net assets available for benefits. The principal components of the receivables and investment categories are presented below.

Actuarial Methods and Assumptions

The information contained in the Schedules of Funding Progress is based on the actuarial study dated January 1, 2005 and calendar year 2005 activity. The actuarial accrued liability and schedule of funding progress is presented by the retirement systems for the last ten years in their separately presented financial reports based on the report generated by the latest actuarial study, conducted by Gabriel, Roeder, Smith & Company. The actuarial value of assets is based on a smoothed expected investment income rate. Investment income in excess or shortfall of the expected 8 percent return on fair value is smoothed over a five-year period with 20 percent of a year's

excess or shortfall being recognized each year, beginning with the current year. All systems use the entry age actuarial cost method and the level percent of payroll amortization method. The remaining amortization period for all systems is open group, 20 years, open period. An inflation rate of 3 percent is used for all systems. Post retirement cost of living adjustments are non-compounding and are based on the original benefit. The adjustments are also limited to the actual CPI increase for the year with any unusual CPI increase not met carried forward to subsequent years. Below is the Schedule of Funding Progress.

B. Teachers Insurance and Annuity Association-College Retirement Equities Fund

Teachers Insurance and Annuity Association-College Retirement Equities Fund (TIAA-CREF), privately administered defined-contribution retirement plans, provides individual retirement fund contracts for each eligible participating employee. Eligible employees are mainly state college/university faculty and staff. Benefits to retired employees are generally based on the value of the individual contracts and the estimated life expectancy of the employee at retirement and are fully vested from the date of employment. The total current year required contribution and the amount paid is 14.2 percent of the employee's annual salary. Most of the employers contribute both the employer and the employee share of 7.1 percent. The State has no further liability once annual contributions are made.

The total contribution made by the college and university (component units) to the TIAA-CREF retirement system for June 30, 2006 and 2005, were \$105.08 million and \$98.347 million, respectively.

NOTE 17. POSTEMPLOYMENT BENEFITS

At the option of the individual state agencies, employees may be offered participation in a post retirement benefits program, as set forth in Section 67-19-14(2) of the *Utah Code*. In order to qualify, the employee must be eligible to receive retirement benefits. The 2005 Legislature passed House Bill 213, *Unused Sick Leave at Retirement Amendments* that became effective January 1, 2006. Beginning January 1, 2006, upon retirement, the employee receives 25 percent of the value of unused accumulated sick leave as a mandatory employer contribution into a 401(k) account. Employees retiring prior to January 1, 2006, were paid up to 25 percent of the value of unused accumulated sick leave.

In addition, the employee may receive health and life insurance coverage for up to five years or until age 65, whichever comes first. However, as of January 1, 2006, this part of the program will phase out over the next five years. If the employee has not reached age 65 or the employee retires after the phase out period, then that employee may exchange one day of unused accumulated sick leave earned prior to January 1, 2006, for one month of paid health and life insurance coverage. After age 65, the employee may use any remaining unused accumulated sick leave, earned prior to January 1, 2006, to exchange for spouse health insurance to age 65, or Medicare supplemental insurance for the employee or spouse. The value of any unused accumulated sick leave earned on or after January 1, 2006, will be converted to a health reimbursement account for the retiree at retirement. As of June 30, 2006, there were 2,842 individuals on the program. For retirees that participate in the health program, insurance premiums are paid 100 percent by the State for individuals that retired before July 1, 2000. Individuals retiring thereafter are required to pay between 2 and 7 percent of the cost depending on the coverage selected.

The Governmental Accounting Standards Board (GASB) issued Statement 43, *Financial Reporting for Postemployment Benefit Plans Other Than Pension Plans*. Additionally GASB issued Statement 45, *Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions*. GASB Statements 43 and 45, which will be implemented by the State for the fiscal year beginning July 1, 2006, will require that the long-term cost of retirement health care and other obligations for postemployment benefits be determined on an actuarial basis and

reported similar to pension plans. An actuarial study was completed to determine the actuarial accrued liability as of December 31, 2004. The study determined the liability if funded at transition of \$487.798 million, or \$749.238 million if not funded at transition. GASB Statement 45 does not mandate the pre-funding of postemployment benefit liabilities. However, any pre-funding of these benefits will help minimize or eliminate the postemployment benefit obligation that will be required to be reported on the financial statements. The Legislature took steps through the appropriations process to fund the actuarial required contribution (ARC) of \$46.814 million for the fiscal year ending June 30, 2007. In addition, the Legislature is expected to consider the creation of a trust fund in the next General Session. The State will request another actuarial study prior to implementing these standards for fiscal year 2007.

The estimated 25 percent sick leave payouts at retirement and the estimated unused sick leave that will be converted to health reimbursement accounts are included in the liability for compensated absences. Charges to agency budgets are made on an ongoing basis to fund the current payments for postemployment benefits and compensated absences. For the year ended June 30, 2006, \$20.492 million in postemployment benefit expenditures were recognized.

A liability is also reported in the Pension Trust Funds of \$6.162 million, including \$2.401 million for compensated absences, which will be liquidated by assets of Utah Retirement Systems.

All employers who participate in the State Retirement Systems are eligible to participate in the Public Employees Long-term Disability Program per Section 49-21-201 of the *Utah Code*. Employees of those state agencies who participate in the program and meet long-term disability eligibility receive benefits for the duration of their disability up to the time they are eligible for retirement or until age 65. Benefits begin after a three-month waiting period and are paid 100 percent by the program. As of June 30, 2006, there are 331 state employees receiving benefits. The program is funded by paying premiums to the Public Employees Health Program (component unit), where assets are set aside for future payments. For the year ended June 30, 2006, the State paid \$5.618 million in premiums and the program has \$25.982 million in assets.

NOTE 18. RISK MANAGEMENT AND INSURANCE

It is the policy of the State of Utah to periodically assess the proper combination of commercial insurance and self-insurance to cover the risk of losses to which it may be exposed. This is accomplished by the State through the Risk Management (internal service fund) and the Public Employees Health Program (component unit). The State is the predominant participant in these programs. The Risk Management Fund manages the general property, auto/physical damage, and liability risk of the State. The Public Employees Health Program manages the health insurance programs of the State. The University of Utah, Utah State University, Southern Utah University, and Salt Lake Community College (component units) each maintain self-insurance funds to manage health care. The University of Utah also maintains a self-insurance fund to manage medical malpractice liabilities.

The State has determined that the risk funds can economically and effectively manage the State's risks internally and have set aside assets for claim settlement. The risks are covered through reserves and commercial insurance for excessive losses. The State has not had any losses or settlements that exceeded the commercial excess

insurance coverage for any of the last three years. The risk funds service all claims for risk of loss to which the State is exposed, including general liability, property and casualty, auto/physical damage, group medical and dental, and some environmental claims. They also service the general risk claims for all local school districts and many charter schools within the State. All funds, agencies, schools, and public authorities of the State may participate in the State's Risk Management and Public Employees Health Programs. The risk funds allocate the cost of providing claims servicing, claims payment, and commercial insurance by charging a "premium" to each agency, public authority, or employee, based on each organization's estimated current year liability and property values. The reserve for liability losses is determined using an independent actuarial study based on past, current, and estimated loss experiences.

Risk Management and Public Employees Health Program claims liabilities are reported when it is probable that a loss has occurred and the amount of that loss can be reasonably estimated and include an amount for claims that have been incurred but not reported. Because actual claims liabilities are affected by complex factors including inflation, changes in legal doctrines and insurance benefits, and unanticipated damage awards, the process used in computing claims liabilities does not necessarily result in exact amounts. Claims liabilities are recomputed periodically by actuaries to take into consideration recently settled claims, the frequency of claims, and other economic and social factors. Inflation is included in this

calculation because reliance is based on historical data that reflects past inflation and other appropriate modifiers. The Risk Management claim liabilities reserves are reported using a discount rate of 5 percent. The Public Employees Health Program long-term disability benefit reserves are reported using a discount rate of 5.5 percent. The primary government and the discrete component units of the State paid premiums to the Public Employees Health Program of \$262.026 million and \$12.658 million, respectively, for health and life insurance coverage in fiscal year 2006. In addition, the State Department of Health paid \$30.738 million in premiums to the Public Employees Health Program for the Children's Health Insurance Program.

The State covers its workers' compensation risk by purchasing insurance from Workers' Compensation Fund (a related organization). The University of Utah, Utah State University, Southern Utah University, and Salt Lake Community College report claims liabilities if it is probable that a liability has been incurred as of the date of the financial statements and the amount of the loss can be reasonably estimated. The University of Utah and the University of Utah Hospital and Clinics have a "claims made" umbrella malpractice insurance policy in an amount considered adequate by its respective administrations for catastrophic malpractice liabilities in excess of the trusts' fund balances. Amounts for the current year are included below.

The following table presents the changes in claims liabilities balances (short-and long-term combined) during fiscal years ended June 30, 2005, and June 30, 2006:

Changes in Claims Liabilities
(Expressed in Thousands)

	Beginning Balance	Current Year Claims and Changes in Estimates	Claims Payments	Ending Balance
Risk Management:				
2005.....	\$ 40,423	\$ 11,250	\$ (7,000)	\$ 44,673
2006.....	\$ 44,673	\$ 12,758	\$ (10,706)	\$ 46,725
Public Employees Health Program:				
2005.....	\$ 99,314	\$ 463,990	\$(455,908)	\$ 107,396
2006.....	\$ 107,396	\$ 515,022	\$(498,983)	\$ 123,435
College and University Self-Insurance:				
2005.....	\$ 44,899	\$ 154,507	\$(143,993)	\$ 55,413
2006.....	\$ 55,413	\$ 171,412	\$(168,650)	\$ 58,175

NOTE 19. SUBSEQUENT EVENTS

On October 26, 2006 the University of Utah (major component unit) issued \$77.145 million Hospital Revenue and Refunding Bonds Series 2006A and \$20.240 million Variable Rate Hospital Revenue Bonds Series 2006B.

In August 2006 Salt Lake Community College (nonmajor component unit) received and accepted an offer to purchase a building in downtown Salt Lake City for \$5.2 million with settlement on October 20, 2006. As part of the closing, notes payable to RDA and Zions Bank totaling \$4.508 million were liquidated. The terms of the sale permit continued occupancy

through December 31, 2006 allowing classes to continue through fall semester.

Subsequent to June 30, 2006 the Utah Housing Corporation (major component unit) issued \$13.905 million Single-Family Mortgage Purchase Variable Rate Bonds, 2006 Series D, maturing on January 1, 2038, interest at a variable rate adjusted weekly, and issued \$21.095 million Single-Family Mortgage Purchase Fixed Rate Bonds, 2006 Series D, maturing July 1, 2008 through 2016, on January 1, 2028 and 2032, and on July 1, 2034, interest rate of 4 percent and 6.41 percent.

NOTES TO REQUIRED SUPPLEMENTARY INFORMATION – BUDGETARY REPORTING**Budgetary Presentation**

A Budgetary Comparison Schedule is presented for each of the State's major governmental funds for which the Legislature enacts an annual budget. An annual budget is also adopted for the Debt Service Fund, a nonmajor fund. The budgets are enacted through passage of *Appropriations Acts*. Budgets for specific general revenues are not adopted through an *Appropriations Act* but are based on supporting estimates approved by the Executive Appropriations Committee of the Legislature. General revenues are those revenues available for appropriation for any program or purpose as allowed by law. Department-specific revenues are revenues dedicated by an *Appropriations Act* or restricted by other law or external grantor to a specific program or purpose.

Original budgets and related revenue estimates represent the spending authority enacted through *Appropriations Acts* as of June 30, 2006, and include nonlapsing carryforward balances from the prior fiscal year. Final budgets represent the original budget as amended by supplemental appropriations and related changes in revenue estimates, executive order reductions when applicable, and changes authorized or required by law when department-specific revenues either exceed or fall short of budgeted amounts.

Unexpended balances at yearend may: (1) lapse to unrestricted balances and be available for future appropriation; (2) lapse to restricted balances and be available for future appropriation restricted for specific purposes as defined by statute; or (3) be nonlapsing, which means balances are reported as reservations of fund balance. The nonlapsing balances are considered automatically reappropriated as authorized by statute, by an *Appropriations Act*, or by limited encumbrances.

Budgetary Control

In September of each year, all agencies of the government submit requests for appropriations to the Governor's Office of Planning and Budget so that a budget may be prepared. The budget is prepared by fund, function, and activity and includes information on the past year, current year estimates, and requested appropriations for the next fiscal year.

In January, the proposed budget is presented to the Legislature. The Legislature reviews the budget, makes changes, and prepares the annual *Appropriations Act*. The Legislature passes the *Appropriations Act* by a simple majority vote. The *Appropriations Act* becomes the State's authorized operating budget upon the Governor's signature. The *Constitution of Utah* requires that budgeted expenditures not exceed estimated revenues and other sources of funding, including beginning balances.

Budgetary control is maintained at the functional or organizational level, as identified by numbered line items in the *Appropriations Act*. Budgets may be modified if federal funding or revenue specifically dedicated for a line item exceeds original estimates in the *Appropriations Act*. If funding sources are not sufficient to cover the appropriation, the Governor is required to reduce the budget by the amount of the deficiency. Any other changes to the budget must be approved by the Legislature in a supplemental *Appropriations Act*.

Any department that spends more than the authorized amount must submit a report explaining the overspending to the State Board of Examiners. The Board will recommend corrective action, which may include a request to the Legislature for a supplemental appropriation to cover the deficit. If a supplemental appropriation is not approved, the department must cover the overspending with the subsequent year's budget. In the General Fund, the State Courts Administrator's budget for juror and witness fees was overexpended by \$82 thousand. This deficit is allowed by statute and will be funded with future appropriations. All other appropriated budgets of the State were within their authorized spending levels.

Spending Limitation

The State also has an appropriation limitation statute that limits the growth in state appropriations. The total of the amount appropriated from unrestricted General Fund sources plus the income tax revenues appropriated for higher education is limited to the growth in population and inflation. The appropriations limitation can be exceeded only if a fiscal emergency is declared and approved by more than two-thirds of both houses of the Legislature, or if approved by a vote of the people. However, the appropriations limitation statute may be amended by a majority of both houses of the Legislature. Appropriations for debt service, emergency expenditures, amounts from other than unrestricted revenue sources, transfers to the Budgetary Reserve Account (Rainy Day Fund), Education Budget Reserve Account and the Transportation Investment Fund; or capital developments meeting certain criteria are exempt from the appropriations limitation. For the fiscal year ended June 30, 2006, the State was \$50.401 million below the appropriations limitation. The State is currently below the fiscal year 2007 appropriations limitation by \$18.77 million.

INFORMATION ABOUT INFRASTRUCTURE ASSETS REPORTED USING THE MODIFIED APPROACH

As allowed by GASB Statement No. 34, *Basic Financial Statements—and Management’s Discussion and Analysis—for State and Local Governments*, the State has adopted an alternative to reporting depreciation on roads and bridges (infrastructure assets) maintained by the Utah Department of Transportation (UDOT). This includes infrastructure acquired prior to fiscal year 1981. Under this alternative method, referred to as the “modified approach,” infrastructure assets are not depreciated, and maintenance and preservation costs are expensed.

In order to utilize the modified approach, the State is required to:

- Maintain an asset management system that includes an up-to-date inventory of eligible infrastructure assets.
- Perform and document replicable condition assessments of the eligible infrastructure assets and summarize the results using a measurement scale.
- Estimate each year the annual amount to maintain and preserve the eligible infrastructure assets at the condition level established and disclosed by the State.
- Document that the infrastructure assets are being preserved approximately at, or above the condition level established by the State.

Roads

UDOT uses the Pavement Management System to determine the condition of 5,680 centerline miles of state roads. The assessment is based on the Ride Index, which is a measure of ride quality on a 1 to 5 scale, with 5 representing new or nearly new pavements that provide a very smooth ride. The Ride Index is calculated from the International Roughness Index (IRI), with pavement type (asphalt or concrete) taken into account. The IRI is a mathematical statistic based on the longitudinal profile of the road.

Category	Range	Description
Very Good	4.35 – 5.00	New or nearly new pavements that provide a very smooth ride, and are mainly free of distress.
Good	3.55 – 4.34	Pavements that provide an adequate ride, and exhibit few, if any, visible signs of distress.
Fair	2.75 – 3.54	Surface defects in this category such as cracking, rutting, and raveling are affecting the ride.
Poor	1.85 – 2.74	These roadways have deteriorated to such an extent that they are in need of resurfacing and the ride is noticeably rough.
Very Poor	1.00 – 1.84	Pavements in this category are severely deteriorated, and the ride quality must be improved.

Condition Level

The State’s established condition level is to maintain 50 percent of its roads with a rating of “fair” or better and no more than 15 percent of roads with a rating of “very poor.”

The State performs complete assessments on a calendar year basis. The following table reports the result of pavements with ratings of “fair” or better (ratings of 2.75 through 5.0) or “very poor” (ratings of 1.0 through 1.84) for the last three years:

Rating	2005	2004	2003
Fair or Better	69.5%	74.7%	74.8%
Very Poor	6.3%	6.2%	6.4%

The following table presents the State's estimated amounts needed to maintain and preserve roads at or above the established condition levels addressed above, and the amounts actually spent for each of the past five reporting periods (in thousands):

FISCAL YEAR	ESTIMATED SPENDING	ACTUAL SPENDING
2006	\$ 240,854	\$ 366,600
2005	\$ 226,345	\$ 307,858
2004	\$ 231,214	\$ 262,741
2003	\$ 230,860	\$ 224,645
2002	\$ 242,287	\$ 281,260

Bridges

UDOT uses the Structures Inventory System to monitor the condition of the 1,814 state-owned bridges. A number, ranging from 1 to 100, is calculated based on condition, geometry, functional use, safety, and other factors. Three categories of condition are established in relation to the number range as follows:

Category	Range	Description
Good	80 – 100	Preventive maintenance requirements include repair leaking deck joints, apply deck overlays and seals, place concrete sealers to splash zones, paint steel surfaces, and minor beam repairs.
Fair	50 – 79	Corrective repairs include deck, beam, and substructure repairs, fixing settled approaches, and repairing collision damage.
Poor	1 – 49	Major rehabilitation and replacement includes deck, beam, or substructure replacements or replacement of the entire bridge.

Condition Level

The State performs complete assessments on an annual basis ending April 1 of each year. The established condition level is to maintain 50 percent of the bridges with a rating of "good" and no more than 15 percent with a rating of "poor." The following table reports the results of the bridges assessed for the past three years:

Rating	2006	2005	2004
Good	71.0%	71.0%	70.0%
Poor	2.0%	3.0%	3.0%

The following table presents the State's estimated amounts needed to maintain and preserve bridges at or above the established condition levels addressed above, and the amounts actually spent for each of the past five reporting periods (in thousands):

FISCAL YEAR	ESTIMATED SPENDING	ACTUAL SPENDING
2006	\$ 42,504	\$ 64,694
2005	\$ 39,943	\$ 54,328
2004	\$ 40,803	\$ 46,366
2003	\$ 40,739	\$ 39,644
2002	\$ 42,757	\$ 49,634

SUPPLEMENTARY INFORMATION

This page intentionally left blank.

Nonmajor Governmental Funds

Tobacco Endowment Fund

This fund accounts for a portion of proceeds relating to the State's settlement agreement with major tobacco manufacturers. The principal of the fund cannot be appropriated except by a three-fourths vote of both houses of the Legislature and with the concurrence of the Governor. One-half of all interest and dividends on fund assets is deposited in the General Fund.

Environmental Reclamation

This fund consists of various programs aimed at preserving open land, improving irrigation in the State, funding recycling programs, and funding cleanup and reclamation projects. Funds received are from state appropriations, fees and fines, recovered liens and costs, and voluntary contributions.

Crime Victim Reparation

This fund accounts for court ordered restitution and a surcharge on criminal fines, penalties, and forfeitures. Monies deposited in this fund are for victim reparations, other victim services, and, as appropriated, costs of administering the fund.

Universal Telephone Services

This fund is designed to preserve and promote universal telephone service throughout the State by ensuring that all citizens have access to affordable basic telephone service. Revenues come from surcharges on customers' phone bills and from fines and penalties levied against telephone service providers by the Public Service Commission.

Consumer Education Fund

This fund accounts for revenues and expenditures associated with educating and training Utah residents in various consumer matters. Funding is provided through the assessment and collection of fines and penalties from various regulated professions.

Rural Development Fund

This fund promotes various programs in rural areas of the State including construction of communications systems and economic development grants to Native American tribes. Funding comes from oil and gas severance taxes and from royalties on mineral extractions on federal land within the State.

State Capitol Fund

This fund was created to account for the funding and operations of the State Capitol Preservation Board. Funds are used in part to pay for repairs, maintenance, and the restoration of Capitol Hill facilities and grounds. Funding is provided through private donations, fees, and legislative appropriations.

Miscellaneous Special Revenue

This fund is made up of individual small funds set up to account for various revenue sources that are legally restricted to expenditures for specific purposes.

Capital Projects – General Government

This fund accounts for the acquisition or construction of major capital facilities for use by the State and its component units. The fund receives financial resources from the proceeds of general obligation bonds, legislative appropriations, and intergovernmental revenues.

Capital Projects – State Building Ownership Authority (Blended Component Unit)

This fund accounts for the acquisition or construction of major capital facilities for use by various state agencies. The fund receives financial resources from the proceeds of lease revenue bonds issued by the Authority and the interest earned on the proceeds of the bonds.

Debt Service – General Government

This fund accounts for the payment of principal and interest on the State's general obligation bonds. The fund receives most of its financial resources from appropriations made by the Legislature.

Debt Service – State Building Ownership Authority (Blended Component Unit)

This fund accounts for the payment of principal and interest on lease revenue bonds issued by the Authority. The fund receives financial resources from rent payments made by various state agencies occupying the facilities owned by the Authority.

Nonmajor Enterprise Funds

Community Impact Loan Fund

This fund provides loans to local governments to alleviate the social, economic, and public financial impacts resulting from the development of the State's natural resources. Working capital for this fund is provided from federal mineral lease funds transferred from the General Fund.

Housing Loan Programs

These programs provide loans or grants to low income or special needs individuals for construction, rehabilitation, or purchase of multi-family or single family housing. Funds are provided from federal funds, appropriations, loan repayments, and interest earnings.

Agriculture Loan Fund

This fund is comprised of two separate revolving loan programs: the Agriculture Resource Development Loan Fund and the Rural Rehabilitation Fund. Both programs issue farm loans for soil and water conservation projects and the rehabilitation of rural areas within the State.

Clean Fuels Vehicle Loan Fund

This fund was created to provide a revolving loan fund for the conversion of government and private fleet vehicles to clean fuel. Funds are provided from public and private contributions, appropriations, and interest earnings on loans and invested funds.

Petroleum Storage Tank Loan Fund

This fund was created to provide revolving loan capital to support small businesses, increase the availability of gasoline in rural areas, and reduce the threat of a petroleum release. Funds are provided from appropriations and interest earnings on loans and invested funds.

Alcoholic Beverage Control

The Alcoholic Beverage Control Commission was established to conduct, license, and regulate the sale of alcoholic beverages. Funding is provided through the sale of products. The net profit from the fund is transferred to the State's General Fund and is used for general government purposes.

Utah Correctional Industries (UCI)

UCI was established to provide work training opportunities for inmates of the Utah State Prison. UCI manufactures and sells such items as license plates, furniture, highway signs, dairy and meat products, and provides printing and other miscellaneous products and services. Funding comes from charges for products and services.

State Trust Lands Administration

This agency manages the assets of the Trust Lands permanent fund. Its objective is to maximize the growth of principal and income production for the beneficiaries.

Utah Dairy Commission

The purpose of the Commission is to promote the use of dairy products. Its operations are comprised of promotion, advertising, research, and nutritional education regarding dairy products. Funding consists primarily of collections from milk producers.

Internal Service Funds

Technology Services

This fund is responsible for providing data processing, computer programming, and voice and data communication services to state agencies.

General Services

This fund is used to administer office supply contracts and provide statewide copy and mail services to state agencies. This fund is also used to account for the central warehouse services for the Department of Natural Resources and the renting and maintaining of facilities used by the Department of Human Services.

Fleet Operations

This fund accounts for automobile rental, fuel dispensing, and surplus property services to state agencies.

Risk Management

This fund is used to account for insurance coverage and loss prevention provided to state agencies, institutions of higher education, and participating local school districts. Coverage is provided using a combination of self-insurance and private excess insurance.

Property Management

This fund has statutory responsibility for the operation and maintenance of facilities used by state agencies.

State Debt Collection

This fund provides a central collection process for the delinquent receivables of the State. It is funded through collection fees.

Transportation Infrastructure Loan Fund

This fund was created as a revolving loan fund to provide infrastructure assistance to state and local governments to expedite construction projects. The fund was capitalized with federal grants and state matching appropriations.

Fiduciary Funds

DEFINED BENEFIT PENSION PLANS AND OTHER PENSION TRUST FUNDS

These funds are used to account for the various pension funds and deferred compensation trust funds administered by the Utah Retirement Systems. Funding comes from employee and employer contributions and investment earnings. Contributions in some systems are augmented by fees, insurance premium taxes, or legislative appropriations.

PRIVATE PURPOSE TRUST FUNDS

Utah Navajo Nation Trust

This fund receives oil royalties, operating, and other trust revenues. Funds received are used for the health, education, and general welfare of members of the Utah Chapters of the Navajo Nation.

Unclaimed Property Trust

This fund is used to account for unclaimed property escheated to the State. Proceeds of the fund pay the administrative costs to operate the fund and any claims. The remaining proceeds are deposited in the Uniform School Fund and are used to fund public education.

Employers' Reinsurance Trust

This fund primarily provides compensation to individuals injured from industrial accidents or occupational diseases occurring on or before June 30, 1994, where the injury is of a permanent nature and workers' compensation benefits have expired. Revenues come from assessments on insurance premiums and court-ordered penalties. The net assets of the fund are held in trust for injured workers and cannot be used for any other purpose.

Petroleum Storage Tank Trust

This fund is used to pay the costs of damage caused by petroleum storage tank releases. Sources of funding include fees from participating companies, recovered costs and settlements from responsible parties, and investment income. The net assets of this fund are held in trust for the benefit of participants and cannot be used for any other purpose.

Utah Educational Savings Plan Trust

This fund was created as a means to encourage investment in a public trust to pay for future higher education costs. Participant contributions are used to pay for future college expenses.

Miscellaneous Restricted Trust

This is made up of various small individual funds created to receive and disburse funds in accordance with applicable laws and trust agreements.

AGENCY FUNDS

Taxes and Social Security

This fund is used to account for federal withholding and social security taxes on the State's payroll.

County and Local Collections

This fund receives and disburses various taxes collected by the State on behalf of county and local governments.

State Courts

This fund receives and disburses various fines and forfeitures collected by the State Courts on behalf of state and local agencies.

Deposits, Suspense, and Miscellaneous

This fund is made up of small individual funds set up to account for various receipts and disbursements.

This page intentionally left blank.

Nonmajor Component Units

Comprehensive Health Insurance Pool

The Pool was created as a nonprofit quasi-governmental entity to provide access to health insurance coverage for residents of the State who are considered uninsurable. Ongoing operating costs are recovered through premium charges supplemented with appropriations from the General Fund.

Utah Schools for the Deaf and Blind

The Schools were created to provide practical education to individuals with hearing and/or vision impairments, through direct and indirect education services, as well as consultation to their families and service providers.

Heber Valley Historic Railroad Authority

The Authority was created to operate, maintain, improve, and provide for a scenic and historic railway in and around the Heber Valley in Wasatch County. Operations are funded primarily through user charges.

Utah State Fair Corporation

The Corporation was created to operate the State Fair Park and conduct the Utah State Fair and other expositions and entertainment events. Operations are funded by admissions, rentals, donations, and state appropriations.

Colleges and Universities

The colleges and universities are the State's public institutions of higher education. The nonmajor institutions of higher education are:

- Weber State University
- Southern Utah University
- Salt Lake Community College
- Utah Valley State College
- Dixie State College of Utah
- College of Eastern Utah
- Snow College
- Utah College of Applied Technology

STATISTICAL SECTION

This page intentionally left blank.

STATISTICAL SECTION

The Statistical Section provides additional historical, context, and detail to aid in using the information in the financial statements, notes to the financial statements, and required supplementary information for the primary government of the State of Utah in understanding and assessing the State's overall financial health.

Financial Trends Information

These schedules present trend information to help the reader understand how the State's financial performance and fiscal health have changed over time.

Schedule A-1	Net Assets by Component	184
Schedule A-2	Changes in Net Assets	186
Schedule A-3	Fund Balances — Governmental Funds	190
Schedule A-4	Changes in Fund Balances — Governmental Funds	192

Revenue Capacity Information

These schedules contain information to help the reader understand the State's capacity to raise revenues and the sources of those revenues.

Schedule B-1	Revenue Base	194
Schedule B-2	Revenue Payers by Industry — Taxable Sales, Services, and Use Tax Purchases	196
Schedule B-3	Revenue Payers — Personal Income Tax	197
Schedule B-4	Personal Income Tax Rates	198

Debt Capacity Information

These schedules present information to help the reader understand and assess the State's levels of outstanding debt and the State's ability to issue additional debt in the future.

Schedule C-1	Ratios of Outstanding Debt by Type	200
Schedule C-2	Other Long-Term Liabilities	202
Schedule C-3	Legal Debt Margin	204
Schedule C-4	Statutory Debt Limit	204
Schedule C-5	Pledged Revenue Bond Coverage	206

Demographic and Economic Information

These schedules contain demographic and economic indicators to help the reader understand the environment within the State's financial activities take place.

Schedule D-1	Demographic and Economic Indicators	207
Schedule D-2	Principal Employers	208
Schedule D-3	Composition of Labor Force	210
Schedule D-4	Public Education Student Enrollment (K-12)	212
Schedule D-5	Public Higher Education Enrollment	212

Operating Information

These schedules offer operating data to help the reader understand how the information in the State's financial report relates to the services it provides and the activities it performs.

Schedule E-1	Full-Time Equivalent State Employees by Function	214
Schedule E-2	Operating Indicators by Function	216
Schedule E-3	Capital Asset Statistics by Function	218

Other Information

These graphs and schedules offer a historical view of expenditures in constant dollars.

Schedule F-1	Expenditures — Historical and Constant Dollars	220
Schedule F-2	Per Capita Expenditures — Historical and Constant Dollars	221

Sources: Unless otherwise noted, the information in the following schedules is derived from the State of Utah Comprehensive Annual Financial Report.

Notes: The State implemented GASB Statement 34 in fiscal year 2002. The government-wide schedules are effective beginning in fiscal year 2002.

This schedule has been restated for prior period adjustments. Adjustments were made to the fiscal year and the preceding fiscal year in which the prior period adjustment was identified.

¹ From fiscal years 2004 to 2006, governmental activities' restricted and unrestricted net assets increased due to higher tax revenues from a strengthening economy.

² From fiscal years 2003 to 2004, business-type activities' restricted net assets decreased primarily due to unemployment claims exceeding related revenue.

³ In fiscal year 2006, business-type activities' unrestricted net assets increased primarily due to the State adding additional capital to the Community Impact Loan Fund from increased mineral lease revenues.

Notes: The State implemented GASB Statement 34 in fiscal year 2002. The government-wide schedules are effective beginning in fiscal year 2002.

Legislative action created the Governor's Office of Economic Development in fiscal year 2006; This action moved activity from the community and culture function to the general government function.

This schedule has been restated for prior period adjustments. Adjustments were made to the fiscal year and the preceding fiscal year in which the prior period adjustment was identified.

¹ Expenses for health and environmental quality have increased over the last five fiscal years due to rising Medicaid program costs.

² From fiscal years 2005 to 2006 public education expenses increased for enrollment growth and increased costs related to benefits for educators.

³ From fiscal years 2005 to 2006, general tax revenues, specifically sales and use taxes, individual income taxes, and corporate taxes, increased significantly compared to prior years due to Utah's continued economic improvement.

⁴ From fiscal years 2004 to 2006 unemployment compensation expenses decreased, reflecting Utah's improved employment.

Notes: Due to changes in the State's fund structure initiated when GASB Statement 34 was implemented, the changes in fund balance information is only available beginning in fiscal year 2002.

This schedule has been restated for prior period adjustments. Adjustments were made to the fiscal year and the preceding fiscal year in which the prior period adjustment was identified.

¹ From fiscal years 2004 to 2006, general fund unreserved fund balances increased due to higher tax revenues from a strengthening economy.

² From fiscal years 2004 to 2006, unreserved fund balance for capital projects reported a deficit as a result of outstanding encumbrances. Appropriations and bond proceeds available in the following fiscal year fund the outstanding encumbrances.

² In fiscal year 2002, the decrease in fair value in investments for the permanent fund created a negative revenue.

³ Expenditures for health and environmental quality have increased over the last five fiscal years due to rising Medicaid program costs.

⁴ From fiscal years 2005 to 2006 public education expenditures increased for enrollment growth and increased costs related to benefits for educators.

Note: Only principal debt is included. Not included are premiums, discounts, and deferred amounts on refundings.

Ratios of outstanding debt by type, presented separately by governmental and business-type activities, are only available beginning in fiscal year 2002 when the State implemented GASB Statement 34.

¹ Ratios are calculated using personal income and population data. See Schedule D–1 for personal income and population data.

² The percentage of Net General Obligation Bonded Debt based upon taxable property value is presented for comparative purposes. The State does not presently levy ad valorem property taxes for General Obligation Bonded Debt, but is authorized to do so in accordance with Title 59, Chapter 2, Part 901 of the *Utah Code*. See Schedule C–3 for taxable property value.

Source: Utah State Tax Commission.

Note: Article XIV, Section 5 of the *Utah Constitution* authorizes general obligation debt for purposes as authorized by the Legislature. Section 1 of the Article limits outstanding state general obligation debt to 1.5 percent of the fair market value of the taxable property in the State. Net General Obligation Bonded Debt includes premiums, discounts, and deferred amounts on refundings.

¹ Taxable property is assessed January 1 of each year. The value used for the fiscal year limitation is from the prior calendar year; assessed values as of January 1, 2005, are used for fiscal year 2006.

² Prior to fiscal year 2002, only principal debt is included; not included are premiums, discounts and deferred amounts on refundings.

Source: Utah State Administrative Services, Division of Finance.

Notes: Article XIV, Section 5 of the *Utah Constitution* authorizes general obligation debt for purposes as authorized by the Legislature. In addition, Title 63, Chapter 38c of the *Utah Code* limits outstanding state general obligation debt to not exceed the applicable percentage (unless approved by more than two-thirds of both houses of the Legislature) of that fiscal year's appropriations limit. Net General Obligation Bonded Debt includes premiums, discounts, and deferred amounts on refundings.

¹ The 2004 Legislature made changes to the calculation of the appropriations limit which also necessitated changing the applicable percentage from 20 to 45 percent, effective for fiscal year 2004.

2002	\$ 72,451	\$ 22,216	\$ 50,235	\$ 7,540	\$ 29,367	1.36

Notes: Details regarding the State's outstanding bonds can be found in Note 10. Long-term Liabilities in the financial statements.

Due to changes in the State's fund structure initiated when GASB Statement 34 was implemented, pledged revenue bond coverage is only available beginning in fiscal year 2002.

¹ Revenues for State Building Ownership Authority are primarily lease rental payments. Revenues for Water Loans are primarily interest on revolving loan receivables. Revenues for Student Assistance Programs are primarily interest on student loans and federal allowances.

² Operating Expenses do not include interest, depreciation, or amortization expenses.

³ Coverage equals net available revenue divided by debt service.
